

Disable Sites from Pop-UP Blockers

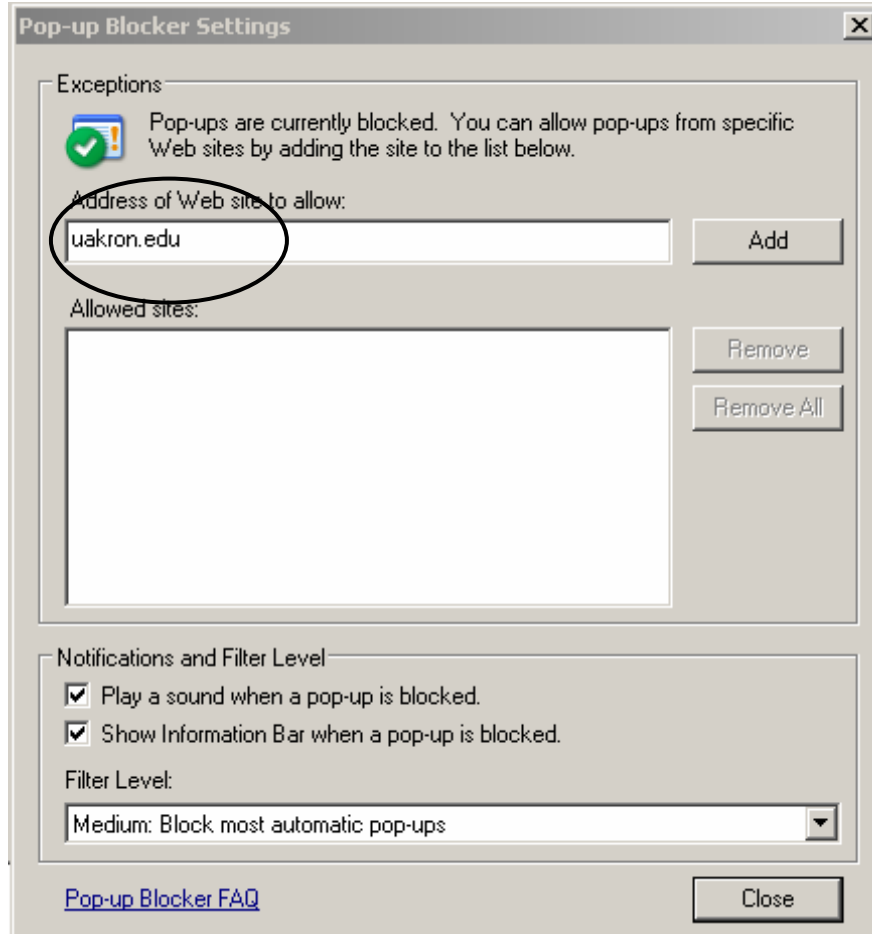

Anyone who is running Windows XP Service Pack 2 may experience difficulty with certain applications, such as WebCT and PeopleSoft, due to the blocking of pop-ups. The following instructions are provided to enable pop-ups from The University of Akron web sites.

1. From within Internet Explorer, select **Tools - Internet Options**.
2. Click the **Privacy** tab.
3. Click the **Settings** button located at the bottom of the screen. If you do not have the “Pop-up Blocker” section on the Privacy tab this is an indication that you do NOT have Service Pack 2 installed and therefore, do not need to follow these instructions.

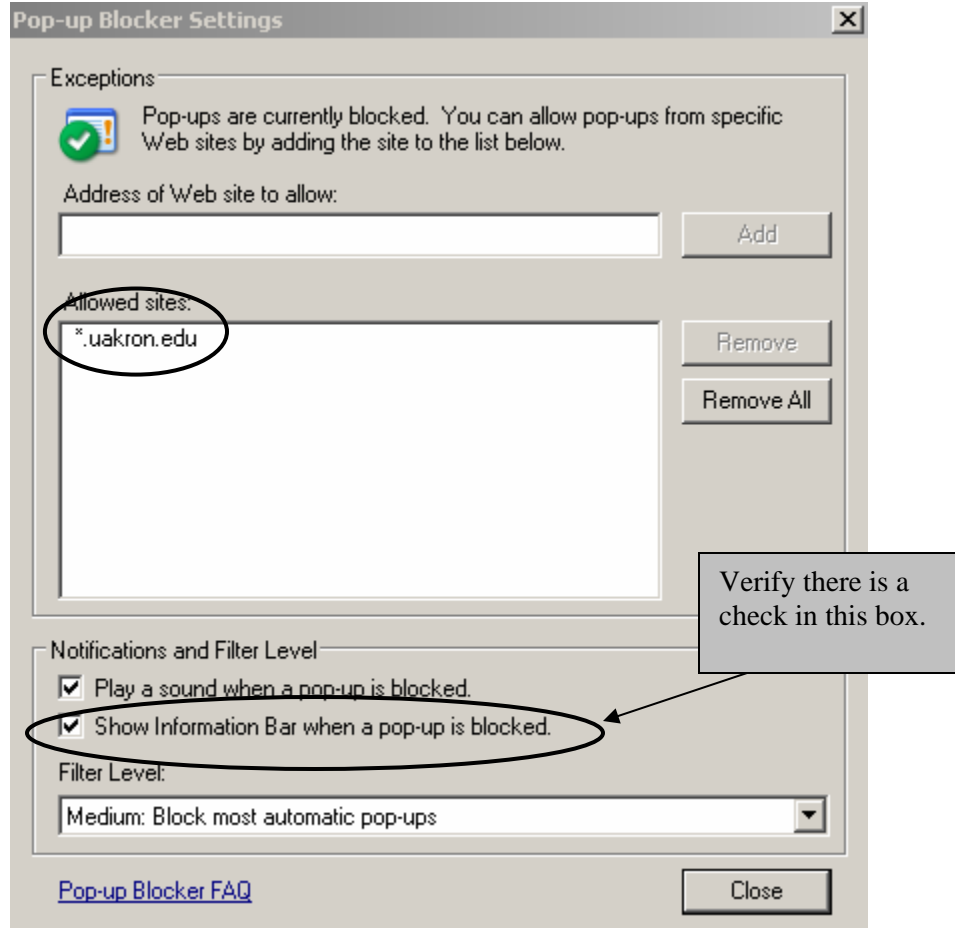

Note: Block Pop-ups should be checked.

4. Type the following under “Address of Web site to allow:” *uakron.edu*

5. Click the Add button. Under “Allowed sites” you should see ***.uakron.edu**

6. Make sure there is a check in the box for “*Show Information Bar when a pop-up is blocked*”.
7. Click the **Close** button.
8. Click **OK**.
