

Lean Refresher Seminar

This course is designed for those who are having difficulty protecting the gains or maintaining the momentum. It is also designed for those in the early stages of implementation who wish to avoid the roadblocks to reaching Lean's full potential.

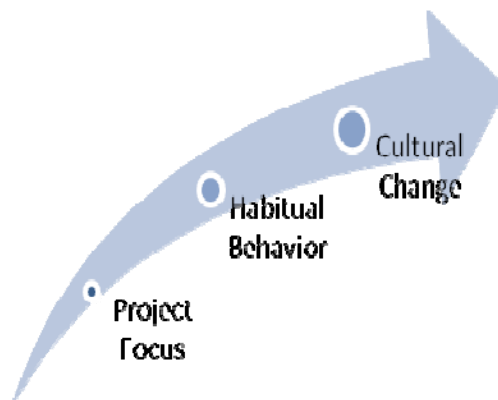

Sustaining Lean – The Critical Key to Success

In today's economy, companies need to focus on the benefits that Lean can deliver. This one-day interactive seminar will help you re-invigorate your Lean process, sustain the gains and achieve powerful results.

Our facilitator, Brian Furlong delivers this hard-hitting seminar covering tactical and strategic actions needed to minimize the effects of the recession and emerge from it stronger than the competition. Brian has 30 years of experience in manufacturing and finance and has successfully implemented Lean in numerous facilities in the U.S., Mexico, Europe and Asia.

You will learn the new "E-12 Lean Leadership and Management System," to help you incorporate the Lean philosophy through all aspects of your organization.

Course #14660 Thu 8:30 a.m.-3:30 p.m. November 19 \$249
First Congregational Church
