Summit College

Since 1964, thousands of people have advanced their careers at Summit County's only community college. In 2004, The University of Akron reorganized and expanded this academic unit and renamed it Summit College.

Today students can choose from approximately 40 associate degree programs, nine bachelor's degree programs, many certificate programs and professional development opportunities. The college is composed of six units:

- *Summit Community College*, offering associate degrees and certificate programs
- *Summit School of Technology*, providing bachelor degrees in technical programs
- *General Studies*, serving students from the general university population as well as Summit College
- *Developmental Programs*, providing academic support for all university students through individual tutoring, work in the study skills centers, mathematics and writing laboratories and study strategies courses
- *Tech Prep*, integrating technical training and college prep academics beginning in high school and continuing through a minimum of an associate degree. College Tech Prep prepares students for highly skilled occupations supported by regional business and industry in the areas of business, information, health and engineering technologies
- *Workforce Development & Continuing Education*, providing continuing and professional development courses, programs and services for lifelong learning
- *Early College*, a high school operating on the campus of The University of Akron in conjunction with Akron Public Schools. This program allows students to earn college credit, in addition to their high school curriculum
