Total credits Emergency Medical Services Technology degree:	66	

The Fire/Medic option will provide fire service professionals or those seeking employment in the fire service opportunities to attain the A.A.S. in Emergency Medical Services Technology Fire/Medic option while maintaining their status as nationally certified fire fighter. The program utilizes National Fire Protection Association (NFPA) Standards – Fire Fighter I and Fire Fighter II within the Fire Protection Technology Independent Study component to enhance career development as a Fire/Medic.

Upon application and matriculation to the University and a concurrent presentation of an official paramedic transcript from an accredited EMS training facility with a graduation date of 1985 or thereafter, academic transfer credit will be awarded to individuals for certified paramedic education as part of the Emergency Medical Services Technology degree Fire/Medic option.
