

Bachelor of Music Performance Piano Accompanying C50107BM

The following information has official approval of the **School of Music**, but is intended only as a supplemental guide. Official degree requirements are established at the time of transfer and admission to the degree-granting college. *Completion of this degree within the identified time frame below is contingent upon many factors, including but not limited to: class availability, total number of required credits, work schedule, finances, family, course drops/withdrawals, successfully passing courses, prerequisites, among others.* The transfer process is completed through an appointment with your academic advisor.

It is recommended that students consider taking General Education courses during some summer sessions to reduce credit load during the regular academic year.

Italicized courses fulfill General Education requirements. Unless a course is specified, refer to the General Education guide at http://www.uakron.edu/advising/docs/General_Education_Guide.pdf

CAREER INFORMATION

Studio teaching: Private teachers or **studio teachers** comprise the largest group of music teachers in America today. Small group instruction, particularly class piano, is also done by studio teachers.

The music teacher who gives individual instruction does so in the studio, which may be located in the home, a school, or a community fine arts center. Those who teach in the home are self-employed, whereas the others usually have a business relationship with a school. Many self-employed music teachers teach part-time to supplement other earnings.

The largest field of individual instruction is piano. Very few, if any, qualified teachers of piano are without a sufficient number of pupils or students. Teachers of voice and other instruments are in demand in varying degrees. Teaching arrangements can sometimes be made with the various types of schools which are in need of individual music instructors; such arrangements are made individually.

Music Teaching in Elementary and Secondary Schools: Many opportunities for service in **full-time teaching positions** exist in the **public and private schools**.

In the nursery, kindergarten, and elementary schools, the duties of the music teacher may include instruction in vocal and instrumental music, eurythmics, listening, creative and integrated activities.

Music in the junior and senior high schools may include general music, appreciation, listening, extracurricular music activities, theory and music literature, and the direction of many choral and instrumental organizations, in addition to small ensembles and the production of musicals. Music educators are employed as teachers, supervisors, or directors of music and they are employed at local, county, and state levels.

In addition, music educators in the public schools find many opportunities for extra remuneration for **service in community music, conducting** bands, orchestras, choruses, church choirs, and organizing recreational programs. In short, in many communities, the music department of the public schools is the focal point of the musical life of the community.

Music Teaching in Colleges and Other Schools: Full-time college teaching involves continued study, research, concert performance, and composition appropriate to the area of specialization. After one has become established on a campus, there is the possibility of tenure attached to some positions. The salaries vary considerably with the type of college and its location. The possibility for positions are open for many kinds of specialists on larger faculties, since every type of musical activity has a specialized program leading to the Bachelor's degree. In the smaller colleges, those who can teach more than one aspect of music have a better chance of employment, especially combining private instruction with an academic area such as theory, history, literature, or with ensemble direction.

While college faculties in many cases are interested in people who have had successful professional careers or success as teachers of music, a college musician must have earned at least a master's degree in music. If the teaching emphasis is primarily in an academic area, a doctorate is usually required.

Opportunity for Employment: Resources for employment include **public schools, parochial schools, colleges, universities, conservatories, private schools, studios, ensembles (instrumental, vocal), churches, and community fine arts centers**. It is not unusual for musicians to be engaged in several part-time positions combining varied teaching and performing responsibilities.

Minimum College Training Required: In the public schools, teaching licensure and a Bachelor's degree are required. The Master's degree must be earned within ten years of the Bachelor's to maintain licensure. In other areas of music, degrees are not always required, but the equivalent training is usually necessary.

Other Careers in Music: Many communities throughout the country maintain municipal music associations which use experienced and well-trained staffs. The **music industry** absorbs a large number of people who must be trained in music for the publishing, manufacturing, and selling of the music instruments, accessories, materials, and music used by millions of consumers. In the field of general industry, there is a growing demand for well-trained and experienced musicians to direct the many phases of musical programs.

Music librarians are finding more and more opportunities not only in schools and colleges, but also as music specialists in public libraries. Music specialists are needed in radio, television, and motion pictures. Many hospitals and schools for learning disabled and handicapped children have programs which employ **music therapists**. Tuner-technicians of piano and organ are more effective if their training in music is substantial.

Conducting is a form of performance which demands many additional attributes, and while this field is somewhat limited, there are hundreds of amateur and professional orchestras, bands, and choruses in need of professional conductors.

Salaries: Salaries will vary immensely depending upon the musical skills of the student and ultimately the type of employment engaged.
