BS Surveying and Mapping
Program Educational Objectives

Program educational objectives are broad statements that describe what graduates are expected to attain within a few years after graduation. Program educational objectives are based on the needs of the program’s constituencies. The educational objectives for the Surveying and Mapping program are for graduates to attain:

1. The ability to progress toward professional licensure.

2. The knowledge and technical ability to manage geospatial data.

3. The ability to work with project teams and to effectively communicate within a professional environment.

4. Leadership potential in project management and in professional organizations.

5. An understanding of ethics, professional responsibility, and the necessity for life-long learning.
