

This step-by-step guide will demonstrate how to move modules, placeholders, and objects in **Content** using the **Course Builder** tool in Desire2Learn (D2L).

## Course Builder: Move Module, Placeholder, or Object

1. To move a **module**, in the **Course Builder Canvas**, drag the **module** you would like to move from its current location to the desired location.

2. To move an **object** or **placeholder**, drag the **object** or **placeholder** from its current location to the desired parent **module**.
