

Student Health Services
The University of Akron

ALLERGY INJECTION PROTOCOL

- Students requesting assistance with allergy injections must provide serum and exact instructions from their allergist.
- Students must report for injection exactly as ordered by their allergists. If you are late for your injection, the dosage may be reduced and the benefit of the allergy treatment may be decreased.
- If you arrive beyond the prescribed schedule for injections, you will be responsible for contacting your allergist and arranging for the new orders to be faxed to Student Health. You will be provided a copy of recently received injections for your allergist's reference.
- Visit fee of \$15 and injection fees apply.
- Allergy serums are kept in the Health Services refrigerator. Each container will be labeled with your name.
- **YOU ARE REQUIRED TO REMAIN IN THE HEALTH SERVICES WAITING ROOM FOR 20-30-MINUTES AFTER YOUR INJECTION as specified by the ordering physician. If you notice any unusual reaction during your waiting period (hives, tightness in your chest, flushing of face, perspiration, dizziness, etc.) REPORT TO NURSES IMMEDIATELY.**
- We require that a physician is present in the clinic when allergy injections are given. Please call for physician hours.
- Please save this instruction sheet for reference until you are thoroughly familiar with the procedure.

I have reviewed this protocol and I understand and agree with the procedures and statements outlined above.
