Program educational objectives are broad statements that describe what graduates are expected to attain within a few years after graduation. Program educational objectives are based on the needs of the program’s constituencies. The educational objectives for graduates of the GIS/LIS program are to:

1. Possess the technical and professional skills to gain employment in the geospatial industries at the technician level.

2. Progress successfully in their careers with a propensity to engage in life-long learning, continual improvement of their skills and knowledge, and ethical conduct.

3. Be capable and have success in their careers through career advancement, increased responsibility, professional development, and to pursue advanced educational opportunities.
