

SUMMER 2017

5 WEEK 1: JUNE 12 - JULY 16

Economic Forecasting

Mon, Tues & Thurs: 5:30 pm – 8:00 pm

3250:427/527-481

Great resume builder! This course uses real-world data to develop methods for building, identifying, and fitting dynamic economic models in an applied setting. You'll refine these techniques with plenty of guided, hands-on experience.

But wait...there's more! You'll also get an introduction to the increasingly popular statistical language, R.

No prior knowledge of R is necessary.

Prerequisites: 200 and 201 or 244; 3470:261 and 262, or permission of the Economics department.
