

It's Easy

Education Majors

Earn the
Certificate in Environmental Studies
while completing your Education degree

The Center for Environmental Studies awards undergraduate and graduate Certificates to students in degree programs at University of Akron. This is similar to a “Minor”. Each involves taking 16 credits from a variety of required and elective courses. Our alumni include majors in accounting, biology, chemical and civil engineering, education, geography, geology, polymer science, and many other fields. Eighty-five percent of alumni surveyed believed that the certificate was helpful in their obtaining employment.

If you are completing any of the following program plans, you can probably earn a certificate with only 2 more courses (5 credits)

Earth Science Licensure and Chemistry Endorsement
Earth Science Licensure and Physics Endorsement
Life Science Licensure and Chemistry Endorsement
Life Science Licensure and Physics Endorsement
Physical Science (Chemistry & Physics) Licensure

In most cases the only additional courses needed are Introduction to Environmental Science (3010:201) and Seminar in Environmental Studies (3010:401/501). There are no extra fees to participate in the Certificate Program, and the Certification will appear on your transcript.
