

Minimum Requirements: Software

| PC | Minimum Recommendations |
|------------------|--------------------------------------|
| Operating System | Windows XP Pro; Windows 2000 Pro |
| Browser | Internet Explorer 6.0 Service Pack 1 |
| APPLE | |
| Operating System | OS 9.2 or higher |
| Browser | Internet Explorer 5; Netscape 6.2 |

The Help Desk (330-972-6888) can assist you in determining the version of software you are currently running. If your software must be upgraded, the Help Desk will open a work order. If you request a software upgrade, whether for v8 or for any other purpose, you will need all the necessary contact information (name, office, phone number, etc.) as well as serial number of the computer. Requests for software upgrades should be made at least one month prior to the launch date. As each module is launched, v7.6 of that module will no longer operate. However, **DO NOT** remove it. Beginning early in 2005, PC Services will remove v7.6 (all modules).

Minimum Requirements: Hardware

| PC | Minimum Recommended |
|--------------------|----------------------------|
| Processor Speed | 450 MHz |
| Memory | 256 MB |
| Video Resolution * | 800 x 600 |
| APPLE | |
| Processor Speed | 450 MHz |
| Memory | 256 MB |
| Video Resolution | 800 x 600 |

* Video Resolution: some pages may need 1024 x 768

If your hardware does not meet the minimum standards, report it to your Department Chair who will determine the appropriate action. Department chairs, contact PC Services for details about upgrading hardware.

NOTE: If you purchased a new computer within the last three years, your system may already meet the minimum requirements.

Contact & More Information
