

## Installing Ad-Aware

1. Click **Start – Control Panel**. Double click on the **Run Advertised Programs** icon.
2. Locate the entry for “**LavaSoft Ad-Aware SE Plus**” and click once on the entry. Click the **Run** button begin the installation.

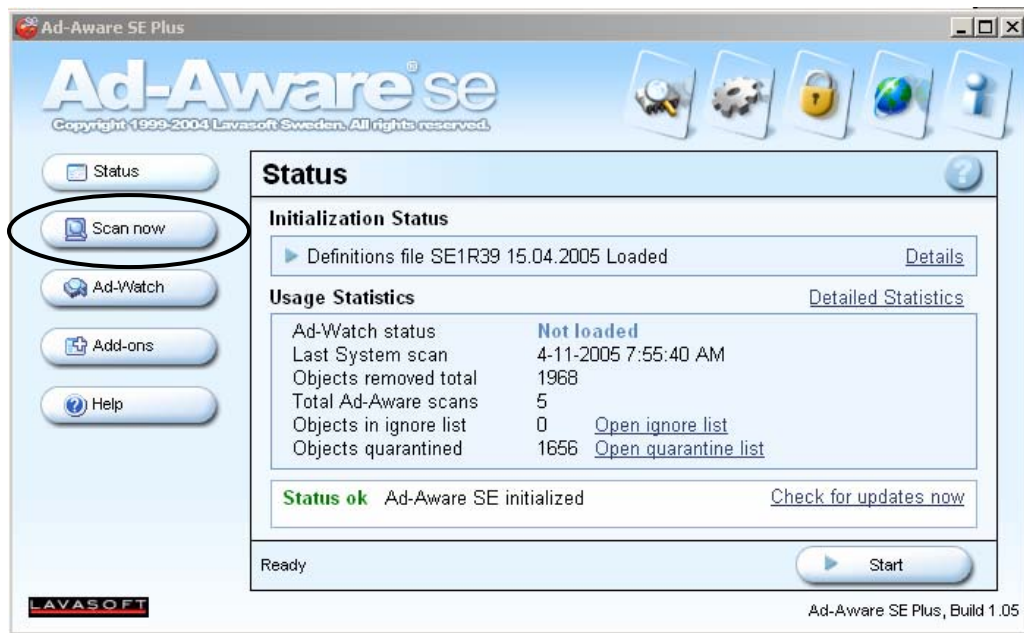

3. Follow the on-screen instructions to install the application.

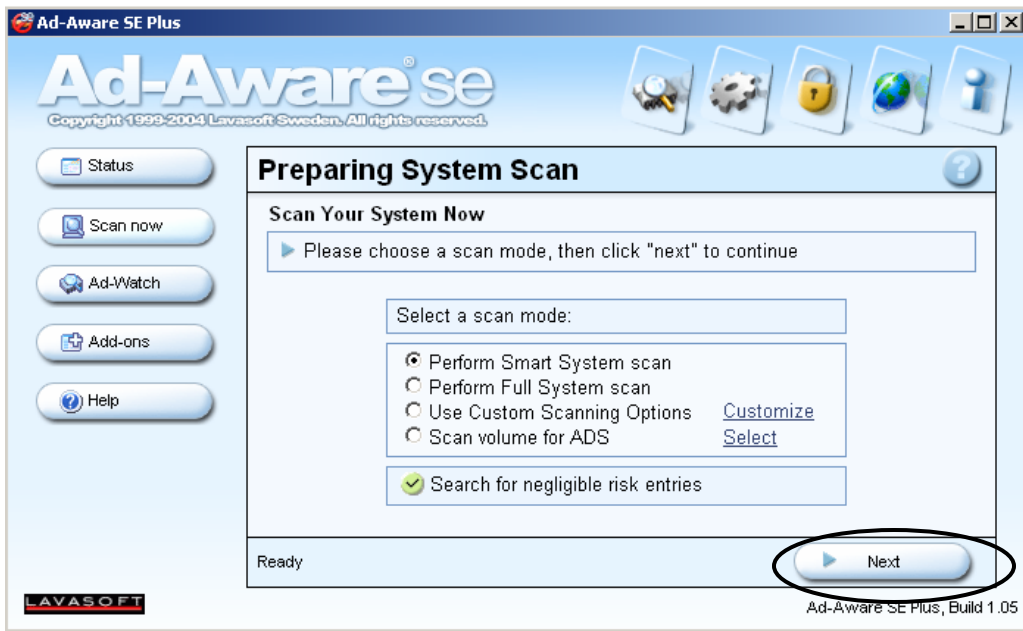

## Running Ad-Aware

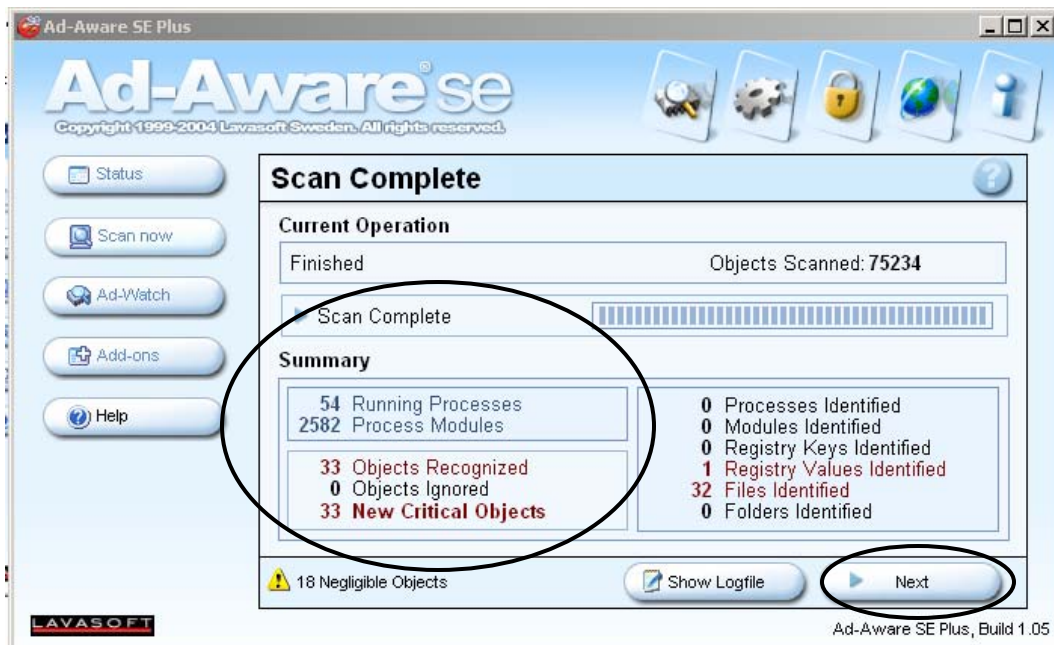

1. Click the **Ad-Aware SE Plus** icon on your desktop. As an alternative, you can select **Start -Programs - Lavasoft Ad-Aware SE Plus – Ad-Aware SE Plus**.
2. The Ad-Aware screen loads. Click the **Scan Now** icon located on the far left of the screen.

- You will be asked to answer one question before the scanning process begins. Leave the default set to “Perform Smart System scan”. Click the **Next** button (at the bottom of the screen).

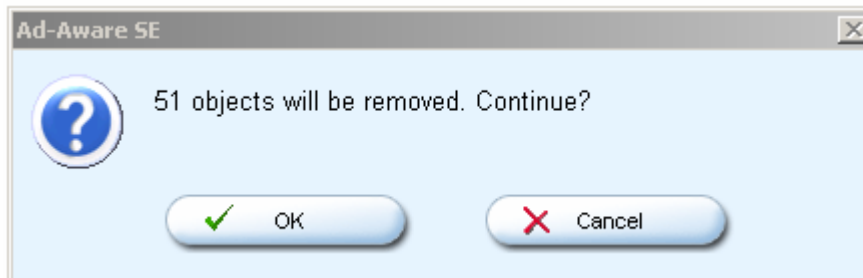

- Your system will be scanned. The process will take approximately 5 minutes. Once completed, you will see the message Scan Complete towards the top of the page. You will see a Summary with the total number of objects recognized, ignored, and critical objects. Click the **Next** button to continue.

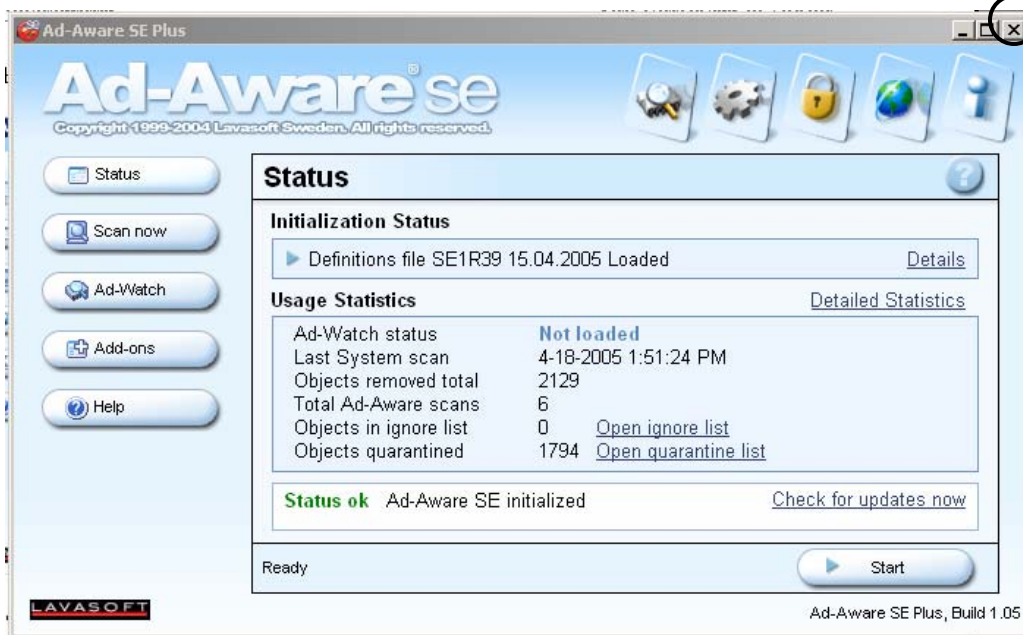

- The details on the recognized objects will be displayed. Click the **Next** button.

- You will be prompted to delete the objects. Click OK to delete the objects.

7. You are returned to the initial screen. You may close the application by clicking the “X” in the upper right corner.

**Remember: You MUST run the Ad-Aware program in order to have it check the computer for adware/spyware.**

**It is recommended that Ad-Aware be run at least once a week.**
