

Install Messenger for the Mac**Install Messenger for the Mac**

Microsoft Messenger 5 for the Mac is communication software that allows individuals with a University of Akron UAnet account to send each other instant messages, files and view an individual's presence (for example, online, busy, out-of-office).

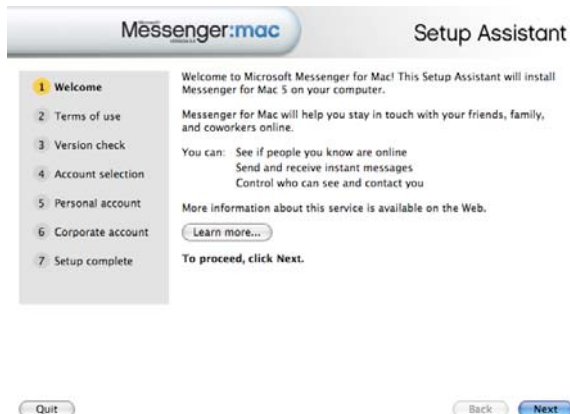

Follow these instructions to install and then setup Messenger for the Mac.

To install Messenger for the Mac on your computer:

1. If a previous version of Messenger is running, Quit that version.
2. Click on Go, Applications. A Finder window is displayed.

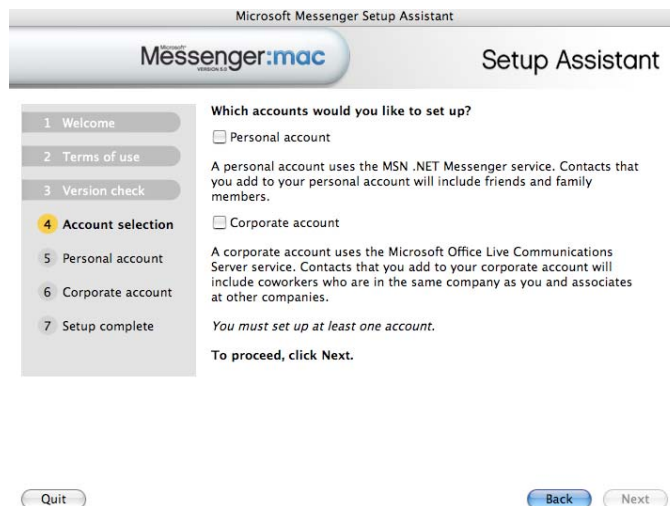

3. Double click on **Microsoft Messenger**. The Setup Assistant for Messenger for Mac 5 is opened.

Install Messenger for the Mac

4. Click **Next**. The .NET Messenger terms of Use are displayed.
5. Scroll to read/view the terms. Click on **Accept**. A message displays:
“Searching for previous versions of Microsoft Messenger . . .”
6. Wait while the installation software completes this step. At completion, a message will display. If a previous version of Messenger was found, OK its deletion. If no previous version was found, OK that message.
7. You are asked which account to set up. Mark the checkbox for **Corporate account**.

Install Messenger for the Mac

8. Click on **Next**. Enter your account information.

Microsoft Messenger Setup Assistant
