

Lindsie Webb

Office of the Dean, Wayne College

I enjoy vacationing with my husband to various places in the world, when time permits. Our favorite U.S. spot is Hilton Head Island, South Carolina. I enjoy spending time with my two nieces, Brynn and Bella. I love to sing and am on the praise team at the Apostolic Church of Barberton. I also enjoy exercising, bike riding, cooking, and shopping.

I have been employed on a full-time basis by The University of Akron since January 2001. I began my career as an Employment Services Assistant in Human Resources Employment Services. While working full-time at the University, I was also a part-time student and completed my Associate Degree in Applied Business in August 2003.

In August 2004, I was promoted to Administrative Assistant in the Student Recreation & Wellness Services Department. This was a new position, which required the establishment of policies and procedures. There were many challenges transitioning into a newly-created position, but that also made it fun and exciting.

In February 2007, I was promoted to Administrative Assistant Senior to the Dean of Wayne College. Since that time, I have had the opportunity to work with the wonderful group (students/faculty/staff) at Wayne College and have made tremendous strides in my professional and personal growth. I knew I had big shoes to fill when accepting this position, given my predecessor had been in the position for over thirty-five years. However, I feel I have successfully transitioned into this position and have made it my own.

Wayne College is approximately 40 minutes from main campus and at times it is challenging to stay connected with the staff members in Akron. I feel that I would be an asset to the SEAC and would well represent the staff members of Wayne College. This would give Wayne College the opportunity to stay better connected with main campus and provide an avenue through which our suggestions and concerns could be heard. I would count it an honor to be selected as the Wayne College representative on the SEAC.
