&
STEM

Hosted By

The H. Kenneth Barker

*Center for **Economic** Education*

This interactive workshop advances entrepreneurship & engineering education across subject areas in schools. It starts with a moderated conversation with industry leaders and expert faculty focused on insights, resources, and research that can be applied in the meaningful teaching and learning of entrepreneurship and engineering in grades 6-12. In the second half, audience members engage in activities and discussion directly related to their practice. Registrants receive a copy of the new curriculum (inclusive of its Educator Toolkit) and a Certificate for Contact Hours.

Spots Limited & Discounted Registration (\$25) Live at <https://www.uakron.edu/barkercenter>
