THE POLITICAL DISCOURSE OF AMNESTY IN IMMIGRATION POLICY

[Shall we refuse to the unhappy fugitives from distress that hospitality which the savages of the wilderness extended to our fathers arriving in this land? Shall oppressed humanity find no asylum on this globe?]

I. INTRODUCTION

Eduardo Sandoval has lived in the United States without legal status for nearly twenty years. He now has a wife and three children who are all U.S. citizens. As the husband of a U.S. citizen, Eduardo would otherwise qualify to adjust his status to that of a legal permanent resident, if not for the fact that he entered without inspection when he

2. This hypothetical is based on a real case, which I encountered working as a law clerk at an immigration firm in Cleveland, Ohio. The name has been changed to preserve the client’s anonymity. The basic premise is a fairly general archetype that typifies an average undocumented immigrant who has resided in the United States for many years.

3. Eduardo married a naturally-born U.S. citizen and his children were born in the United States. See U.S. CONST. amend. XIV, § 1 (stating that “[a]ll persons born . . . in the United States . . . are citizens of the United States and of the State wherein they reside”); see also JEFFREY S. PASSEL, UNAUTHORIZED MIGRANTS, NUMBERS AND CHARACTERISTICS, BACKGROUND BRIEFING PREPARED FOR TASK FORCE ON IMMIGRATION AND AMERICA’S FUTURE 19 (Pew Hispanic Center 2005), http://pewhispanic.org/files/reports/46.pdf (providing data on the number of families that this scenario represents: “A significant share of unauthorized families can be characterized as ‘mixed status’ in which there is one or more unauthorized parent and one or more children who are U.S. citizens by birth.”).

INA § 245 is the chief vehicle by which persons within the United States adjust their status to become legal residents. Until Congress enacted § 245 in 1952, aspiring immigrants, even those already in the United States on a temporary visa, had to do ‘consular processing.’ Under that procedure, still available, the immigrant applies for a visa at a U.S. consular office abroad, which is needed to seek admission to the United States for permanent residence (the "green card").

first came in to the country in 1988. The principal obstacle for Eduardo in his quest for legal status is the requirement that he exit the United States in order to apply for a visa. Once Eduardo leaves the country he will trigger an automatic ten-year bar to reentry.

Despite the fact that Eduardo has lived and worked in the United States longer than he lived in his native country, the Immigration and Nationality Act (“INA”) provides no means for him to remain here legally. Although willing to pay fines and invoke the judicial process,
the only option for Eduardo to remain in the United States is to maintain his illegal status on the fringes of society.¹⁰

Somewhere between eight million and twelve million undocumented immigrants currently live and work in the United States under circumstances similar to those of Eduardo Sandoval.¹¹ Many of them have established roots here that include U.S. citizens as close family members.¹² The continually growing population of

¹¹. The number used for exactly how many undocumented immigrants currently live and work in the United States is subject to interpretation. The very nature of this class’s subverted existence makes calculating an actual number virtually impossible. DEPARTMENT OF HOMELAND SECURITY, STATISTICS-ILLEGAL ALIEN RESIDENT POPULATION, http://www.dhs.gov/xlibrary/assets/statistics/illegal.pdf (last visited Jan. 13, 2007) (“Estimating the size of a hidden population is inherently difficult.”); Critics of immigrants tend to inflate the numbers, while advocates are more likely to use lower numbers. DAVID M. REIMERS, UNWELCOMED STRANGERS 28 (Columbia University Press 1998). “Estimating the number of undocumented immigrants has proved to be controversial, with those wanting to halt the illegal flow usually employing high figures to dramatize the numbers.” Id. In his staunchly anti-immigrant book, State of Emergency, Pat Buchanan estimated the number of so-called “invaders” to be 12 million in 2006. PATRICK J. BUCHANAN, STATE OF EMERGENCY; THE THIRD WORLD INVASION AND CONQUEST OF AMERICA 252 (Thomas Dunne Books 2006). An often-quoted source for a generally unbiased number is the Pew Hispanic Center, which estimated the number at 11 million as of March 2005. JEFFREY S. PASSEL, SIZE AND CHARACTERISTICS OF THE UNAUTHORIZED MIGRANT POPULATION IN THE U.S (Pew Hispanic Center, 2006), http://pewhispanic.org/reports/report.php?ReportID=61. Numbers were calculated based on a March, 2004 Population Survey, conducted by the U.S. Census Bureau and the Department of Labor. Id. At the current rate of growth of half million per year the Pew Hispanic number would be twelve million by March 2007. If you consider the same ratio, then you get into numbers that are very big and more accurately maybe 35 to 45 million.”).

undocumented immigrants provokes controversy in various aspects of public policy. Within the debate over immigration reform lies the underlying question of what constitutes amnesty, and whether the term itself has prevented meaningful reform measures from taking effect.

The post-September 11th security concerns that have driven U.S. politics in recent years have heavily impacted the amnesty debate. Now more than ever, voters and lawmakers alike are concerned about the risk of maintaining the status quo with respect to an unaccounted for “shadow population.” While some politicians propose legalization as a means of documenting these individuals, others contend that militarizing the border and toughening enforcement of immigration laws will better address the issue. In between these two extremes are those who advocate for broad policy reforms through a comprehensive approach.

This Article attempts to inform the reader on how politics surrounding the term itself has distracted lawmakers, and caused an ineffective backlash against all legalization measures. The deadlock which has prevented George W. Bush’s administration from making any significant changes to the INA can be largely attributed to this fundamental concern over amnesty.

Comprehensive immigration reform has been a key talking point for President Bush, as well as Congress, throughout his term. The issue has inspired repeated attempts to craft a reform measure, and

endless amounts of press coverage. Politicians throughout this time have campaigned by taking a stance on the issue, and voters have reacted accordingly. Despite avid attempts by Congress and voters’ enthusiastic endorsements for reform, very little progress has been made under the Bush administration’s term.

In an effort to resolve the dilemma of how to address the undocumented immigrant problem, this Article proposes two changes to the INA. First, Congress should reenact Section 245(i). This code section provides an opportunity for undocumented immigrants to legalize their status. Section 245(i) applies only to a narrow class of immigrants who meet the specifications prescribed by the code, and it requires applicants to pay a substantial fee. Second, the Article suggests reexamining the three and ten-year bars, which were put into place to deter illegal entry, but in effect have exacerbated the problem by

(i)(1) Notwithstanding the provisions of subsections (a) and (c) of this section, an alien physically present in the United States who--(A) entered the United States without inspection; or (B) is within one of the classes enumerated in subsection (c) of this section, may apply to the Attorney General for the adjustment of his or her status to that of an alien lawfully admitted for permanent residence. The Attorney General may accept such application only if the alien remits with such application a sum equalling five times the fee required for the processing of applications under this section as of the date of receipt of the application, but such sum shall not be required from a child under the age of seventeen, or an alien who is the spouse or unmarried child of an individual who obtained temporary or permanent resident status under section 210 or 245A of the Immigration and Nationality Act or section 202 of the Immigration Reform and Control Act of 1986 at any date, who--(i) as of May 5, 1988, was the unmarried child or spouse of the individual who obtained temporary or permanent resident status under section 210 or 245A of the Immigration and Nationality Act or section 202 of the Immigration Reform and Control Act of 1986; (ii) entered the United States before May 5, 1988, resided in the United States on May 5, 1988, and is not a lawful permanent resident; and (iii) applied for benefits under section 301(a) of the Immigration Act of 1990. The sum specified herein shall be in addition to the fee normally required for the processing of an application under this section. (2) Upon receipt of such an application and the sum hereby required, the Attorney General may adjust the status of the alien to that of an alien lawfully admitted for permanent residence if--(A) the alien is eligible to receive an immigrant visa and is admissible to the United States for permanent residence; and (B) an immigrant visa is immediately available to the alien at the time the application is filed. (3) Sums remitted to the Attorney General pursuant to paragraphs (1) and (2) of this subsection shall be disposed of by the Attorney General as provided in sections 286(m), (n), and (o) of this title.

II. AMNESTY-RELATED LEGISLATION

A. Immigration Reform and Control Act

The first attempt to legalize undocumented immigrants en masse was the Immigration Reform and Control Act ("IRCA") of 1986.\footnote{37} The Act permitted undocumented immigrants to become legal permanent

residents without leaving the country for the first time since the INA began regulating immigration in 1952.\textsuperscript{38} In addition to a legalization program, the law attempted to regulate illegal immigration in various other ways.\textsuperscript{39} The law enhanced border security measures, established an employment verification system for employers, and imposed sanctions on employers who hire undocumented immigrants.\textsuperscript{40} IRCA is widely recognized as a failed attempt to regulate undocumented immigration.\textsuperscript{41}

The failure of IRCA to control illegal immigration now stands as the central hurdle in any campaign for a legalization statute.\textsuperscript{42} Known commonly as the “first amnesty,”\textsuperscript{43} IRCA has a pervasive legacy.\textsuperscript{44}

Following IRCA, illegal immigration continued to rise, and many undocumented immigrants in the United States remained without legal status when the opportunity to apply expired. The critical failure of IRCA in terms of inspiring sympathetic supporters was the relative ease of the legalization process.

B. Illegal Immigration Reform and Immigrant Responsibility Act

The Illegal Immigration Reform and Immigrant Responsibility Act ("IIRIRA") of 1996 made a bold attempt to reduce the growing number of undocumented immigrants. A new code section barring undocumented immigrants from reentry was incorporated as part of this expansive body of law. The bars were draconian measures intended to
sanction illegal entry. They did so by imposing a three or ten-year bar to admission or reentry upon any undocumented immigrant who had maintained an unlawful presence within the United States. Much like current proposals to reform immigration, which suggest penalty taxes and criminal convictions to punish the act of illegal entry and stay, the bars were introduced as a means to deter defiance of immigration laws.

The practical effect of the bars has not been deterrence of illegal entry or stay, but rather a disincentive for undocumented immigrants to leave once they have entered without inspection. Because any attempt to exit the country or apply for status might trigger the bars, an undocumented immigrant successfully avoids the bars by remaining in the United States and not applying for any immigration benefit. Given the serious penalties for making their presence known, undocumented immigrants are now more likely than ever to remain undetected.

bars for lawful immigration once an undocumented immigrant is found to have been present illegally).

49. Zoe Lofgren, A Decade of Radical Change in Immigration Law: An Inside Perspective, 16 STAN. L. & POL’Y REV. 349, 355 (2005). While the bars were intended to punish immigrants who had evaded the law through entry or extended stays, imposing the provision on families who had legitimate means to legalize status would punish too harshly. Barbara Hines, So Near Yet So Far Away: The Effect of September 11th on Mexican Immigrants in the United States, 8 TEX. HISP. J.L. & POL’Y 37, 39 (2002) (describing the 1996 immigration laws as draconian).

50. 8 U.S.C.A. § 1182(a)(9)(B)(i)(I) (West 2006) (I.N.A. §212); Stephen Yale-Loehr & Brian Palmer, Unlawful Presence Update, 6 BENDER’S IMMIGRATION BULLETIN 507, at 1 (2001) (explaining the function of the three-year bar). While there are stiffer penalties for forced removal, these penalties apply to immigrants who leave voluntarily before proceedings begin. Id. Unlawful presence of 180 days to one year subjects the immigrant to the three-year bar. Id. A stiff penalty of ten years applies to unlawful presence that exceeds one year. Id.

52. See PASSEL, supra note 3, at 3 (providing speculative data on how the undocumented immigrant population has grown since Congress passed IIRIRA: “the unauthorized population has been steadily increasing in size (and possibly by large increments since the last half of the 1990s”)).

53. See INS Advises Field Offices on Sunset of INA § 245(i), 2 BENDER’S IMMIGRATION BULLETIN 847 (1997) (explaining to INS field officers how Section 245(i)’s expiration will affect the bars: “Other persons besides immediate relatives (spouses, parents and children of U.S. citizens) of U.S. citizens who are eligible to immigrate based on an available visa number, but who arrived without inspection or who violated their status can apply for adjustment of status under section 245(i) by paying a penalty. If 245(i) sunsets, they will be required to apply for their immigrant visa abroad, at which time they will be found inadmissible, if they have been unlawfully present in the U.S. for more than 180 days before leaving the U.S.”).

Essentially, the bars are counter-effective, in that they augment the vast population of undocumented immigrants who have every incentive to avoid alerting authorities of their presence.55

C. Section 245(i)

While the bars ran afoul of immigration goals and exacerbated the existing problems, Section 245(i) provided the necessary balance to legitimize immigration policy.56

Congress enacted Section 245(i) for the first time in 1994.57 Originally the provision was implemented to aid applicants who already qualified to adjust status via consular processing.58 For those applicants who were eligible for adjustment of status at a consulate abroad, Section 245(i) granted domestic INS offices the authority to adjudicate those

undermining law enforcement in their communities. They come to believe the U.S. laws, like the immigration code, are meant to be winked at.”).

56. See Hearing on H.R. 3362 Before the H. Subcomm. on International Law, Immigration, and Refugees of the H. Comm. of the Judiciary, 103rd Cong. 5 (1994) (statement of Katherine L. Vaughns, submitted prior to hearing). In this testimony given when Congress was considering Section 245(i) for the first time, Professor of Law Katherine L. Vaughns articulated the immigration goal served by Section 245(i):

[S]ection 302 of Title III prohibits the privilege of adjusting one’s status here in the United States to those beneficiaries of immediate relative visa approvals heretofore eligible to receive such benefit. This is a congressional prerogative. However, in light of recent congressional action allowing otherwise ineligible applicants the adjustment of status privilege, perhaps section 302 may prove to be counter-productive. Given the apparent legislative desire to provide an incentive for aliens to adjust their status in the United States instead of going abroad for immigrant visa processing overseas, such a measure would thwart this objective.

Id.; see also PASSEL, supra note 3, at 16 (identifying Section 245(i)’s disappearance as a possible explanation for the increased undocumented immigrant population: “There is some suspicion that the more-or-less orderly transition process . . . may have been short-circuited by the legislative changes of the late 1990s, especially affecting 245(i). If true, this change should partially explain the buildup in the unauthorized Mexican population.”); but see Steven A. Camarota & Jessica Vaughan, Op.-Ed., A Loophole in Immigration Law, WASH. POST, Oct. 21, 1997, available at http://www.cis.org/articles/1997/sac_jfv10-21-97.html (arguing against Section 245(i) in order to give effect to the bars: “The sunset of 245(i) is necessary in order to activate a powerful enforcement tool passed last year. . . . If 245(i) ends as scheduled, any illegal alien who aspires to [sic] a green card will have to return home within six months or be subject to the new bar.”).

58. NICOLE W. GREEN, IMMIGRATION; CQ’S VITAL ISSUES SERIES 64 (Ann Chih Lin ed., CQ Press 2002) (“The provision represented a rare opportunity for illegal immigrants to gain legal status, since ordinarily they would have to return to their home countries to apply for a visa and most would not risk leaving the United States with no sure prospect of legal reentry.”).

Although not intended as an amnesty provision,\textsuperscript{61} Section 245(i) had the effect of allowing immigrants who entered without inspection (“illegally”) to legalize status without leaving the country.\textsuperscript{62} In 1997 when Congress extended Section 245(i)’s sunset date to January 14, 1998, it did so with full knowledge of the far-reaching application that the provision had enjoyed over the first three-year period of enforcement.\textsuperscript{63}

The 1997 reenactment demonstrated that when a provision designed to aid undocumented immigrants is considered without political underpinnings, which attach to any amnesty debate, it garners bipartisan support.\textsuperscript{64} While some may characterize the 1997 reenactment as an oversight on the part of the legislature, the legislative history indicates that Congress intended the reenactment as both welcomed and necessary.\textsuperscript{65}

\textsuperscript{62} Similarly, when IRCA passed the term “amnesty” had not yet developed the negative political connotations that it invokes today. While there was debate over whether to adopt such a measure, and some legislators strongly disagreed, those who supported legalization did so without defending the rhetoric used. See 132 CONG. REC. S26,879-01 (daily ed. Oct. 17, 1986) (statement of Sen. Moynihan) (strongly endorsing amnesty: “[f]ortunately, this bill does provide amnesty, for those illegal aliens who entered this country prior to January 1, 1982”); see also Amnesty for Illegal Immigrants: Hearing Before the Subcomm. on Immigration, Borders, and Claims of the H. \textsuperscript{63} Joint Memorandum Concerning the Legal Immigration Family Equity Act of 2000 and
Legislators embraced Section 245(i) as a necessary compliment to the bars. For the majority of undocumented immigrants Section 245(i) was the only section of the INA that allowed adjustment of status without triggering one of the bars. Because Section 245(i) created a means to process adjustment of status applications domestically, it eliminated the threat of the bars for certain undocumented immigrants.

The last extension of Section 245(i) came as part of the Legal Immigration Family Equality (“LIFE”) Act, enacted on December 10, 2000. Arguably, this was the first time that Section 245(i)
was smeared with the label of amnesty.69 The news release for the Act specifically denied the label, and from that moment it became clear that continued reenactments would no longer pass through Congress without controversy.70 Although the provision had received enthusiastic support from both President Clinton71 and President Bush,72 Section 245(i) expired on April 30, 2001.73

I’ve told the Congress that I want to make sure that the Mexican citizen here is well respected, and we will. We’ll respect people in our country. And one way to do that is to pass 245(i), which will allow for families to be reunited. If you believe in family values, if you understand the worth of family and the importance of family, let’s get 245(i) out of the United States Congress and give me a chance to sign it. Id.
In May of 2001, President Bush urged Congress to extend the filing deadline for Section 245(i) beneficiaries. He acknowledged that the April deadline would be hard-felt by the multitude of undocumented immigrants who had been eligible to apply for adjustment prior to the deadline, but had not acted soon enough.

Once the deadline passed in 2001 the true effect of the bars was felt for the first time. Without Section 245(i) as part of the INA, the possibility of adjusting status domestically disappeared completely for any undocumented immigrant who had failed to submit a visa application before the deadline. In a sense, these individuals were trapped by the system, unable to apply domestically, nor able to leave and return. Suddenly any attempt to legalize status became a catch-22, whereby undocumented immigrants could not submit a visa application without leaving the country and thereby triggering a bar to reentry.

III. COMPREHENSIVE IMMIGRATION REFORM

Combining a legalization program as one element of a broader reform effort is the basic concept behind “comprehensive immigration reform.” Comprehensive reform has become a catch-phrase which

[T]hose who do stay here illegally will have virtually no hope of ever qualifying for legal status. Such three-year and 10- year bar provision [sic] will virtually eliminate their ability, as a practical matter, to ever qualify for legal status by making what is an almost impossible task for many today completely impossible.

subverts the highly politicized issue of amnesty and sets the debate in a somewhat even-handed tone. 81 Despite these avid attempts to keep the focus off of amnesty, the issue has continually resurfaced as the central obstacle preventing reform efforts. 82

The ebb and flow of immigration laws presents a contentious illustration of political climates. 83 Immigration policy debates surface in times of political and economic hardship. 84 American citizens and
political representatives alike have long been divided by this fundamental legal issue of how to treat undocumented immigrants. It strikes at the core of political sentiments because it reflects one’s world view, economic status, and racial identity. Given the political significance of the debate, reaching a pragmatic compromise has at times seemed impossible. Instead of compromise, the issue has pushed voters and their representatives in Congress to radical ends.

The critical difference in how voters on both sides of the issue have interpreted the concept of amnesty provides valuable insight into the obstacles that have prevented Congress from drafting meaningful immigration reform.

While Americans may be starkly divided on whether to allow undocumented immigrants to adjust status, the need and desire for effective control of our borders is a widely accepted consensus in the immigration law: “The tragedy of September 11th and its aftermath further reinforce the political nature of this area of law.”; see also Doris Meissner, Immigration in the Post 9-11 Era, 40 BRANDEIS L.J. 851, 851 (2002) (discussing immigration from a post 9-11 perspective, in which security issues dominate). aftermath of the September 11th terrorist attacks. The post-9/11 fear of terrorism incited a mass of legislation introduced by members of both parties to secure our Nation. The present immigration debate is therefore not a question of whether to address the issue. Rather it is a question of how to address the issue. Given the importance of improving security, it remains imperative to any practical solution that we first address the issue of what to do with the unaccounted-for population of immigrants already within the United States.

Fundamental issues such as streamlining a complicated and fragmented bureaucracy, developing efficient and effective services, and determining how to prevent terrorists from passing through our borders undetected will not fairly be addressed until Congress establishes some

level of understanding on how to approach the twelve million undocumented immigrants currently living and working in the United States.

Congress’ recent attempts to draft comprehensive immigration reform measures have provided a welcome look at a flawed system. In anticipation of the 2006 mid-term elections, politicians seized the opportunity to distinguish themselves by taking a stance on immigration reform. The media inflamed the debates and protesters marched in large numbers to oppose the proposals considered by Congress.

Unfortunately, the 109th Congress abandoned the project. Legislation put forth by the House of Representatives has differed sharply from measures proposed by the Senate.

In December 2005, the Sensenbrenner Bill, passed by the House of Representatives, provided the catalyst for the most recent wave of immigration reform. The Sensenbrenner Bill took an enforcement-only approach, which did not include any legalization or guest worker provisions. For immigrants and their advocates, this legislation was purely xenophobic. In response, masses across the country marched.

102. See Hearing on Amnesty for Illegal Immigrants, supra note 64, at 5-7 (statement of Rep. Berman). Even before Congress failed to pass a comprehensive immigration reform bill Representative Berman predicted that the hearings were designed to delay such action: “I am convinced by virtue of what has happened here, both in treating the House-passed bill, what it went through, and in the way people are titling and talking about the hearings in the Senate on the Senate bill, that this is simply a well-orchestrated effort to have this Congress recess before the election without having dealt with one of the country’s most serious national crises.” Id. at 7. Even President Bush, who has been an avid advocate of comprehensive immigration reform, has been accused of stalling action for political gain. Judicial Nominations: Hearing Before the H. Comm. on Senate Judiciary, 109th Cong. 4 (2006) (statement of Patrick Leahy, Ranking Member, Comm. On Senate Judiciary). Senator Leahy said of the President, “Instead of urging his party to take early and decisive action to pass comprehensive immigration reform, as he signaled he would in February 2001, the President began his second term campaigning to undercut the protections of our Social Security system.” Id; cf. Frei, supra note 41, at 1358 (coming to President Bush’s defense by acknowledging his consistent push for immigration reform: “In the months following the election, President Bush has made clear that his guest-worker proposal was not simply election-time rhetoric by continuing to lobby Congress to approve a system that would dramatically change the face of United States immigration law and policy toward Latin Americans.”).

103. Compare S. 2611, 107th Cong. (2006) with H.R. 4437, 107th Cong. (2006). The House bill focused exclusively on law enforcement and enhanced border security without any legalization plan. H.R. 4437, 107th Cong. (2006). The Senate bill, while also including increased border security and law enforcement, also proposed a path to citizenship as part of a temporary guest worker program. issue of border security while ignoring the interrelated immigration
issues that effective border security demands.  Entirely contrary to the
comprehensive reform urged by President Bush and echoed by
Congress, the resulting legislation focuses on measures that have
proven ineffective over the last two decades.

Without additional measures, this attempt to secure the physical
border is unlikely to achieve the desired result of controlling illegal
immigration. The forces that compel illegal entry and stay have
historically continued to exert considerable influence over immigration
patterns regardless of border enforcement. If the massive border

Policies: Hearing Before the S. Comm. on the Budget, 109th Cong. 8 (2006) (statement of Paul R.
Cullinan, Chief, Human Resources Cost Estimates Unit). The report concludes that funding alone
cannot solve the flow of illegal immigration:

In recent years, funding for border security has risen sharply, but it has not kept sizable
numbers of illegal migrants from entering the country or many legal migrants from
overstaying their visas. Although the United States has nearly doubled the number of its
border patrol agents over the past decade, a large flow of immigrants continues to enter
the United States illegally.

enhanced border security efforts to no avail. JoAnne D. Spotts, U.S. Immigration Policy on the
(2002). In 1986, President Reagan signed IRCA, which authorized fifty percent increases in
personnel for the consecutive years of 1987 and 1988. Id. In 1996, President Clinton signed the
Illegal Immigration Reform and Immigration Responsibility Act (“IIRIRA”), which authorized
hiring an additional 1,000 Border Patrol agents every year until 2001. Id. In addition, Attorney
General Janet Reno’s five-part border enforcement plan, announced in 1994, provided for a massive
security overhauls of the 1980’s and 1990’s had any effect at all it was to propel illegal immigration further.\textsuperscript{121}

One explanation for this phenomenon is that the increased border security deterred immigrants from exiting the country.\textsuperscript{122} Many of the immigrants who enter the United States for work perpetually return home, continuing a pattern of entering and exiting in a cyclical fashion.\textsuperscript{123} Undocumented immigrants who are currently present are less likely to leave even temporarily if they know that exiting will jeopardize their opportunity to return.\textsuperscript{124}
The most compelling flaw of the Secure Fence Act, which focuses exclusively on increased border security, is that efforts to augment border security will do nothing to remove or incorporate the twelve million undocumented immigrants who currently live and work throughout the United States. The mere existence of these undocumented persons presents an obvious security challenge for the U.S. government. While mass deportation is often suggested as a remedy to this problem, realistically it is not an option that will ameliorate the situation.

The Congressional address identifies this critical failure in immigration policy: “it is Mexico’s (and to a much lesser extent, Central America’s) tradition of circular migration that can be most accurately described as having been most directly ‘disrupted’ by the US border enforcement policies of the past 10 or so years.” Id. 125. See, e.g., H.R. 4437, 107th Cong. (2006) (noting this proposed legislation is just one of many attempts to regulate immigration through law enforcement strategies). In addition to increased deportations, a law enforcement strategy may also take an indirect approach via the employers who hire undocumented immigrants. H.R. 4437 is an example of such combined efforts to stop illegal immigration. This strategy reflects the push-pull philosophy of illegal immigration. See Senator Alan K. Simpson, The Immigration Reform and Control Act: Immigration Policy and the National Interest, 17 U. Mich. J. L. Reform 147, 154-55 (1984). Jaeger, Deporting the Undocumented: A Cost Assessment (Center for American Progress, Washington, D.C. 2005) at 1, available at http://www.americanprogress.org/kf/deporting_the_undocumented.pdf. The report prefaces the findings by outlining the competing approaches on how to impact the number of undocumented immigrants:
Several practical problems restrict the government from actually removing all undocumented immigrants from the United States. The geographic expanse of the country, the number of undocumented immigrants present, and the limited financial resources available do not permit an undertaking of such magnitude. Even if undocumented immigrants are returned to their home countries, they are likely to return regardless of increased border security measures.

Developing a comprehensive solution to the rising population of undocumented immigrants requires a compassionate understanding of the root causes that feed the problem. In addition to the disparity in

The political debate over immigration reform remains stymied over the question of illegal immigration. . . . resolving the status of the undocumented has become the principal obstacle to achieving consensus on reform.

Most legislative proposals address the situation by providing some form of legal recognition for the undocumented. Yet a number of people, including members of Congress, favor a more draconian solution to the problem — a severe crackdown on illegal immigration not only against those attempting to cross the border, but also the deportation of the entire undocumented population currently living in the United States.

At the beginning of the 21st Century, it is not at all clear that it is possible or even desirable to try to find and then deport all undocumented migrants currently in the U.S., nor to adopt and then implement the stringent measures that would be needed to prevent the continued arrival of additional undocumented aliens each year and deter others from over-staying their legal authorizations.

...
wealth between the United States and the countries where undocumented immigrants originate, there is the problem of bureaucratic borders. Any foreign national desiring to reside permanently in the United States faces serious legal obstacles. Even professional athletes and multimillionaires face immigration challenges. An immigration system that remains difficult and unpredictable for this elite population is even less approachable for economically dependent immigrants. Processing an application for legal permanent residence is simply too complicated and costly to realistically serve undocumented immigrants as a credible alternative to unlawful border crossings or visa overstays.

in this report aim to reduce the pull of both jobs and of ineffective immigration enforcement. On the push side, lack of employment, low wages and poor working conditions, separation from family members, political, social and religious repression, civil conflict, and other problems motivate people to leave their homes. Any effective strategy to prevent unlawful migration must address these causes.

Immigrants who risk their lives to cross the border without inspection are usually reacting to an immediate economic need. Compliance with extremely complicated and unpredictable immigration laws is not an option for immigrants who lack the financial means to even begin the process. For these immigrants the choice is not whether to follow the law, but whether or not to enter.

Optimal immigration laws must take account of the effect they have on illegal immigration. If the laws themselves compel circumvention, then lawmakers have a duty to correct these barriers. Restrictionist efforts to decrease the number of undocumented immigrants inflate the problem by creating a more deeply subverted class of people unrecognized by the law.

skilled workers. Administrative backlogs prevent the issuance of as much as half the employment green cards authorized each year, forcing immigrants and employers alike to turn to temporary visas as the makeshift rout to eventual permanent status. As a result, both the permanent and temporary admission systems have become dysfunctional. Employers and immigrants alike have strong incentives to ‘game the system’ instead of playing by the rules.

The United States must also bear responsibilities that go beyond national borders. Economic development within the United States frequently has a disastrous effect on the natural resources and the stability of so-called developing nations. Political philosopher Judith Lichtenberg argues that we owe an affirmative duty to those whom we make worse off: “[It] has been persuasively argued that economic underdevelopment is, paradoxically, in part a result of economic development; for the transformation to a modern economy, in which the developed nations and the multinational corporations have had a crucial role, erodes traditional means of livelihood for much of the rural population of the developing nations. To the extent that this is so, many (perhaps a majority) of those in the developing nations are absolutely harmed by relations with advanced countries.”

IV. AMNESTY AS A POLITICIZED TERM

The strongest criticism that Section 245(i) has received is the label of amnesty. Appreciating the argument against readopting this measure requires a full understanding of the political stigma that attaches to an amnesty provision.

At the onset, Section 245(i) received little attention because it was not yet deemed an amnesty provision. Because the meaning of the relationship between legal and illegal immigration as a central tenet of a comprehensive approach: "As international migration becomes more common and terrorism a greater threat, the study of illegal immigration will become increasingly important to a comprehensive understanding of the nature and process of immigration.

See Vaughns, supra note 154, at 182 (arguing for comprehensive immigration reform: "A regularization or legalization component, however, is critical to a major overhaul of the immigration system.").

See Goyle & Jaeger, supra note 128, at 9 (revealing the impracticability of mass deportation: "The cost assessment in this report hopefully illustrates the false allure of adopting a mass deportation policy as a response to the challenges threatening our immigration system.").

See JON E. DOUGHERTY, ILLEGALS: THE IMMINENT THREAT POSED BY OUR UNSECURED U.S.-MEXICO BORDER 228-29 (WND Books 2004) (labeling Section 245(i) as amnesty and expressing strong disdain for the general concept of legalization). Hearings in the House over comprehensive immigration reform acknowledged that using the term amnesty distracts from the issue: "what we have is a country that is up in arms about the fact that there is an amnesty bill out there and no real decent, considered, thoughtful conversation and discussion about what we do to deal with the problem of immigration in this country." TIMES, March 29, 2006, at A22 (commenting on S. 2611 and relating the political consequences of attaching the word amnesty to a proposed piece of legislation: "Attackers of a smart, tough Senate bill have smeared it with the most mealy-mouthed word in the immigration glossary – amnesty – in hopes of rendering it politically toxic.").

See Statement by President William J. Clinton Upon Signing H.R. 4603, Departments of Commerce, Justice and State, the Judiciary and Related Agencies Appropriations Act (Aug. 26, 1994) (referencing the effect the Act would have on illegal immigration without commenting on Section 245(i)). The portion of the President’s statement relating to immigration, in its entirety, is as follows:

The Act will enable the Justice Department to escalate its efforts to secure the border and to control illegal immigration. Resources are provided to expand the number of agents at high-risk crossing points to deter illegal immigration, improve the equipment available to agents to increase their effectiveness, expedite deportations of criminal illegal aliens, and increase asylum adjudications. The Act also provides, for the first time, a funding source to help States that are burdened by large numbers of criminal illegal aliens in their prisons. This $130 million initiative highlights the Federal Government’s commitment
term “amnesty” varies depending on one’s political stance, the question of whether Section 245(i) is an amnesty provision becomes a threshold legal question for anyone hoping to readopt the measure.162

Amnesty is perhaps the most controversial term in the immigration lexicon.163 For many the term signifies a complete forgiveness of illegal immigration.164 The concept compels harsh criticism from those who feel that it would unfairly reward illegal entry.165 Implicit in this argument is the concern for how condoning illegal immigration may taint the legitimacy and efficacy of legal immigration.166

On the other hand, for undocumented immigrants and their families immigration reform that includes amnesty provides a glimmer of hope that their lives may eventually stabilize.167 Undocumented populations in the United States are for the most part resigned to live in the shadows of society.168 Given that no provision of law currently allows

to share the responsibility for reducing the fiscal impact of illegal immigration with affected States.

potential to cause more problems than it solves, a more subtle attempt to soften immigration laws should be considered as an experimental middle-ground alternative. The all-or-nothing approach to immigration, which has driven politics for the last quarter century, has proven itself to be unworkable. Effective immigration reform requires some compromise between punishing undocumented immigrants and uncovering their existence.

V. REJECTING AMNESTY: PRESIDENT BUSH’S STANCE

President Bush’s explicit condemnation of amnesty reflects the severe political consequences of proposing any concept that may be labeled as such. In his radio address on April 8, 2006 the President

And that’s going to make our job as elected representatives of the people a lot more difficult in terms of reaching something that can get a majority vote in both the House and the Senate and the President’s signature . . . .”).
AILA believes that any workable immigration reform proposal must be comprehensive. Specifically, it must simultaneously create legal avenues for people to enter the U.S.; allow people already here an opportunity to earn legal status; address backlogs in family and employment-based immigration; and create and implement a smart border security and enforcement regime.

proposed a temporary worker program.\textsuperscript{181} In his discussion he clarified repeatedly that his plan specifically rejected amnesty.\textsuperscript{182} Nonetheless, those who stand firmly against any notion of amnesty are critical of President Bush’s position.\textsuperscript{183}

In May of 2001 President Bush wrote to Congress in an effort to save Section 245(i).\textsuperscript{184} In his plea to extend the provision for those undocumented immigrants who were eligible, but missed the deadline, he advised Congress that “[i]t remains in our national interest to legitimize those resident immigrants, eligible for legal status, and to welcome them as full participants of our society.”\textsuperscript{185} The immigrants whom President Bush referred to were immigrants who had either entered illegally or overstayed their visas, and then remained in the United States for years without legal status.\textsuperscript{186}

Political opponents have heavily criticized President Bush for supporting legalization statutes such as Section 245(i), while rejecting amnesty.\textsuperscript{187} Such critics assert that President Bush’s hard-line convictions against amnesty are deceptive.\textsuperscript{188} In 2006 President Bush appeared to make his position on amnesty clear to the American people:

A new temporary worker program should not provide amnesty.

Granting amnesty would be unfair to those who follow the rules and obey the laws. Amnesty would also be unwise, because it would encourage others to break the law and create new waves of illegal immigration. We must ensure that those who break our laws are not granted an automatic path to citizenship.189

There are two ways to interpret President Bush’s seemingly contradictory statements concerning amnesty. One would be to draw no distinction, and conclude that President Bush’s endorsement of Section 245(i) is entirely consistent with his firm stance against amnesty.190 The other approach would be to find that his position necessarily contradicts itself by condemning amnesty, and then endorsing it at the same time.191

Amnesty opponents argue that if President Bush were against amnesty then he would not have encouraged Congress to legitimize undocumented immigrants by any means.192 Meanwhile amnesty proponents contend either that Section 245(i) is not amnesty, or if it is amnesty, it was harmless with respect to the issues raised by President Bush, and therefore constituted an “amnesty” far different from any legalization proposed today.

VI. LEGALIZATION VERSUS AMNESTY

The conflicting interpretations of amnesty assume different definitions of the term. In one sense the term “amnesty” represents any provision which would allow undocumented immigrants to become legal residents.193 This approach frames amnesty as any law which does not effectively punish the undocumented immigrant population.194 Anti-

(providing insight on Republican skepticism of amnesty: “[Senator Saxby Chambliss, Republican of Georgia] and other Republicans said Mr. Bush’s plan would be viewed as amnesty by many Americans, even if illegal immigrants had to pay fines and meet other requirements, because they would still be rewarded with legal status.”).
194. For a criticism of this approach see Jacoby, supra note 97, at 113. Jacoby provides
immigrant lobbyists generally define the term in this over-inclusive manner.  Those who approach undocumented immigrants with condemnation reject amnesties on the grounds that they encourage unlawful activity.

A narrow construction of amnesty distinguishes between a law that serves alternative policy objectives and one that merely forgives the evasion of immigration laws. Under this approach, a law allowing undocumented immigrants to legalize their status is only considered amnesty when it rewards illegal entry by removing all sanctions. This more specific interpretation of amnesty differentiates the negative connotation of rewarding the offense from the practical, efficient enforcement of immigration laws.

impassioned commentary on why this political stance is ineffective:
Conservatives who criticize the Bush proposal as an unprincipled ‘amnesty’ assume that there are alternatives—that we can simply crack down harder on the border and enforce any quota we like, no matter how unrealistic. But we can’t. Mexican workers want to fill jobs in the United States, and they will continue to find ways to enter the country. Without immigration reform, it will be business as usual on our southern frontier: more futile law enforcement, more migrant deaths, and more crime.

James Sensenbrenner Jr., Republican of Wisconsin and chairman of the House Judiciary Committee, as saying “Amnesty is wrong because it rewards someone for illegal behavior.”).

197. The debate over whether 245(i) constitutes amnesty illustrates this ideological conflict. Compare, e.g., Kennedy, supra note 83 (“Section 245(i) does not provide amnesty to immigrants”) with Numbers USA, http://www.numbersusa.com/interests/amnesty_print.html (last visited Jan. 14, 2006) (an anti-immigration website listing Section 245(i) and the two extensions of the provision as amnesties) and, Border Security and Immigration Issues Hearing, supra note 43, at 5 (labeling Section 245(i) as “rolling amnesty” and stating that it was “responsible for legalizing at least 1.5 million illegal aliens”).

198. Pro-immigrant advocates argue that a legalization program does not constitute amnesty when it requires some form of quid pro quo in exchange for the benefit of adjusting status. See President George W. Bush, Pres. Messages, 109th Cong., 2nd Sess., 2006 U.S.C.A.N. D60, at 3-4 (distinguishing a proposed legalization program from amnesty: “I believe that illegal immigrants who have roots in our country and want to stay should have to pay a meaningful penalty for breaking the law, to pay their taxes, to learn English, and to work in a job for a number of years. People who meet these conditions should be able to apply for citizenship, but approval would not be automatic and they will have to wait in line behind those who played by the rules and followed the law. What I’ve just described is not amnesty . . . .”).

The hard-line approach, which refuses any form of relief to undocumented immigrants, was recently articulated by James R. Edwards, Jr. in his presentation to the House of Representatives at a 2006 hearing on immigration reform. According to Edwards, any relief afforded to these immigrants in obtaining legal status would amount to amnesty: "As a rule, amnesties should be employed sparingly and carefully. They indeed do affront the rule of law because amnesty is an act whereby the civil government overlooks lawbreaking. Amnesty in effect rewards lawbreakers for their lawbreaking. Amnesty lets off certain lawbreakers." Edwards’ approach to amnesty represents one side of a heated debate, that of strict opposition against any provision of law that would allow undocumented immigrants to legalize status. This approach rejects a central component of comprehensive immigration reform, and opts instead for enforcement-only.

On the other side of the debate are those who support a legalization process. While there is a strong tendency to define amnesty as

206. Id. (defending S. 2611 against the title of amnesty: “[t]he path to citizenship laid out by the Specter bill wouldn’t be easy. It would take 11 years, a clean record, a steady job, payment of a $2,000 fine and back taxes, and knowledge of English and civics. That’s not ‘amnesty,’ with its suggestion of getting something for nothing”); but see Martin, supra note 164, at 6 (characterizing S. 2611 as amnesty regardless of what criteria the bill requires undocumented immigrants to fulfill as preconditions to legalization). Perhaps the most well-known spokesman for this position is President George W. Bush. Fact Sheet: Fair and Secure Immigration Reform, (Jan. 7, 2004), available at http://www.whitehouse.gov/news/releases/2004/01/print/20040107-1.html. At various stages in his presidency, Bush encouraged Congress to enact legislation that would allow undocumented immigrants to legalize their status. See, e.g., id. While promoting measures which critics would deprecate as amnesty, the President’s statements and press releases affirmatively rejected any notion of amnesty. Id. In 2004, President Bush proposed a temporary guest worker program for the population of undocumented immigrants then-present in the United States. Id. The press release for this guest worker initiative described a legalization program that would apply to “undocumented men and women,” while disclaiming “President Bush does not support amnesty . . . .” Id. In 2006, President Bush proposed a similar temporary worker program as part of his Comprehensive Immigration Reform plan. Fact Sheet: Comprehensive Immigration Reform: Securing Our Border, Enforcing Our Laws, and Upholding Our Values (Mar. 2006), available at http://www.whitehouse.gov/news/releases/2006/03/20060327-1.html. Although this suggestion differed from the earlier proposal enough to appear less like amnesty, the President’s release asserted that it was not amnesty five times. Id.

207. Amnesty provisions would change the law itself, rather than create an exception to the law. See Jean v. Nelson, 727 F.2d 957, 964 (11th Cir. 1984) (advancing the wide latitude that Congress has to design immigration laws) (citing Chae Chan Ping v. U.S. (The Chinese Exclusion Case), 130 U.S. 581, 609 (1889); 1 C. Gordon & H. Rosenfield, Immigration Law and Procedure § 2.2a (rev. 1982); cf. Wong Wing v. United States, 163 U.S. 228, 237 (1896) (noting that powers of the federal government with regard to aliens are more limited outside the immediate context of regulating entry: “there are apparently no limitations on the power of the federal government to determine what classes of aliens will be permitted to enter the United States or what procedures will be used to determine their admissibility.”).

208. 8 U.S.C.A. § 1227(a)(1)(B) (West 2005) (I.N.A. § 237) (stating the consequence of unlawful presence: “Any alien who is present in the United States in violation of this chapter or any other law of the United States, or whose nonimmigrant visa (or other documentation authorizing admission into the United States as a nonimmigrant) has been revoked under section 1201(i) of this title is deportable”); 8 U.S.C.A. § 1182(a)(6)(A)(i) (West 2005) (I.N.A. § 212) (defining an illegal entrant: “An alien present in the United States without being paroled, or who arrives in the United States at any time or place other than as designated by the Attorney General, is inadmissible”); 8 U.S.C.A. § 1227(a)(1)(A) (West 2005) (I.N.A. § 237) (stating the consequence of unlawful entry: “Any alien who at the time of entry or adjustment of status was within one or more of the classes of aliens inadmissible by the law existing at such time is deportable.”).
amnesty.209 Contrary to the criticism that amnesties “reward lawbreakers”210 and “allow illegal immigrants to cut in line,” most legalization proposals impose significant penalties for having initially broken the law, and require beneficiaries to earn the privilege to adjust status on a schedule behind that of non-lawbreaking applicants.211

VII. PROPOSALS FOR REFORM

Absent from the recent debates on immigration reform has been any discussion of reenacting Section 245(i) of the INA.212 Reincorporating this simple piece of legislation213 presents a workable resolution to the

209. Hearing on Amnesty for Illegal Immigrants, supra note 64. Representative Jackson Lee took issue with the premise of the hearing, as she refuted the label of amnesty for S. 2611: “the question of this hearing uses the word ‘amnesty,’ which has been infused with negative connotations by the opponents of the Senate’s bill, the Comprehensive Immigration Reform Act of 2006, S. 2611. The Senate bill in fact would not grant amnesty.” Id. at 4.

211. See, e.g., Hearing on How Illegal Immigration Impacts Constituencies, Part II, supra note 147, at 39 (statement of Rep. Gutierrez, Witness, Illinois). In his presentation urging Congress to enact a legalization provision, Mr. Gutierrez identified the full extent of sanctions that undocumented immigrants are willing to endure before earning legal status:

Let’s fine them a thousand five hundred bucks . . . . Let’s put them in to a program for 7 years and say you don’t get anything for 7 years unless you work, you pay taxes, you follow all the laws. Let’s put them into indentured servitude programs, but let’s give them hope at the end of the day that after they’ve proven to us, they already are hard-working, committed people to America, that we say at the end of the day, okay, you’ve earned it. You get to join the rest of us, as our history has always allowed us to do in our immigration policy. So I join the Congresswoman in seeking that earned legalization.

In 2006 two bills were introduced that would have extended Section 245(i), but neither prompted a debate in Congress. See Rep. Rangel Introduces Effort to Ease Path to Permanent Residency, US FED NEWS, June 30, 2006, (Rep. Charles B. current impasse. Because it is a relatively straightforward and time-tested alternative to enacting a complicated new law, Section 245(i) could potentially alleviate some of the United States’ post 9/11 security concerns, by allowing certain undocumented immigrants to become official, registered residents.

Reenacting Section 245(i) presents a viable solution to the current amnesty debate because the Act serves competing objectives. First, the provision has proven to be an effective means for undocumented immigrants to legalize status. Legalization is only effective when the potential beneficiaries trust the system enough to come forward out of the shadows. While in effect between 1994 and 2001, Section 245(i)
proved capable of meeting this challenge.\footnote{220. Carlos Alcala, \textit{Many Try to Beat Residency Deadline: Extension is Likely but Lines Long at INS}, \textit{Sacramento Bee}, Oct. 1, 1997, at B3 (chronicling the masses of immigrants who were eager to take advantage of Section 245(i) before it expired: “Would-be immigrants lined up by the hundreds at Sacramento immigration offices Tuesday - and the same scene played out around the country.”).} \footnote{221. GIMPEL AND JAMES R. Section 245(i) meets the demands of skeptics who argue that “amnesties should be employed sparingly and carefully.” As compared to IRCA, which legalized approximately three million undocumented immigrants in six years, Section 245(i) had a much more modest impact.

Third, Section 245(i) does not send a message to foreigners that undocumented immigration is an effective alternative to applying for entry. A principal criticism of legalization is that it will inspire new immigrants to enter illegally. In the final reenactment of Section 245(i) Congress specifically addressed this concern by adding a physical presence requirement. Following this additional requirement, any immigrant who entered after the law went into effect could not access the benefit.

See GREEN, supra note 58 and accompanying text (citing the number of immigrants which the INS anticipated would be affected by the provision); see also Yearbook of Immigration Statistics, Department of Homeland Security, Legal Permanent Residents, Data Tables, http://www.dhs.gov/xlibrary/assets/statistics/yearbook/2005/table01.xls; Legal Permanent Resident Flow: Fiscal Years 1820 to 2005, Table 1, available at http://www.dhs.gov/ximgtn/statistics/publications/LPR05.shtml (showing a significant increase in the number of adjustments between 1989-1991 when the bulk of IRCA applications were processed, but no comparable increase after 1994 when Section 245(i) first passed). The report does show that numbers rose to the IRCA levels following the cut-off date of Section 245(i) in 2001. This lends support to the argument that Section 245(i) should be reenacted permanently in order to avoid this unmanageable swell in applicants. See also Nelly Jefferys & Nancy Rytina, supra note 4 (providing data on the total number of immigrants who have adjusted status). Unfortunately, the report does not identify how many immigrants adjusted status using Section 245(i). Id. The report does state: “In 2005, a total of 1,122,373 persons became LPRs [lawful permanent residents] of the United States . . . . The majority (66 percent) lived in the United States when they became LPRs.” Id. at 1.

230. See Alcala, supra note 220 and accompanying text (because Section 245(i) does not apply to immigrants with prior orders of removal, it will not incite a wave of new undocumented immigrants).

Don Feder, Illegal Immigrants Should Not Be Given Amnesty, in ILLEGAL IMMIGRATION; OPPOSING VIEWPOINTS (William Dudley ed., 2002), at 125 (“Extending blanket amnesty tells inhabitants of the impoverished Third World that if they can sneak past the Border Patrol, Uncle Softie will eventually welcome them with open arms.”).

232. 146 CONG. REC. S11,850-02, S11,851 (2000) (explaining the nature and purpose of Congress’ revisions to Section 245(i): “They also add a new requirement that for all beneficiaries whose application was filed after January 14, 1998, the principal beneficiary must have been physically present in the U.S. on the date of enactment of the LIFE Act Amendments of 2000. The function of this last requirement is to make sure that the renewed availability of section 245(i) does not operate to encourage anyone to violate our immigration laws.”).
In addition to reenacting Section 245(i), Congress should also consider removing the three and ten-year bars. After careful consideration of whether the bars serve their intended purpose, and whether reenacting Section 245(i) would alone be an adequate safeguard to prevent the deterrence to exit, a decision to remove the bars could reduce the number of undocumented immigrants currently in the United States. Now that exceptional amounts of resources have been dedicated to improving border security, it makes sense to remove the disincentive for undocumented immigrants to cross back into their home countries.

The arguments in support of legalization either deny that the definition of amnesty should apply, or reject the notion that amnesty is undesirable. The two lines of argument are merely a difference in semantics, but they illustrate the strong political clout the word evokes. Those who support amnesty and those who refute the idea that a legalization process constitutes amnesty both agree that a well-drafted legalization statute can effectively address the undocumented immigration population, and serve the objectives of comprehensive immigration reform.

VIII. CONCLUSION

Amnesty proponents readily concede that undocumented immigration is not a problem to be solved. So long as there is no

realistic opportunity to enter legally at the onset, nor regularize once here illegally, undocumented immigrants will continue to risk deportation by averting the law.\textsuperscript{240} Congress should nonetheless feel a pressing duty to address the issue by crafting a functional immigration code.\textsuperscript{241} Immigration practitioners and the undocumented population that seek their assistance need an outlet to engage the legal process.\textsuperscript{242} In order to prove successful, immigration reform should focus on those needs, rather than on constituents who have politicized the amnesty debate.\textsuperscript{243}

In the current era of immigration policy, legalization efforts are justifiably plagued by the legacy of IRCA.\textsuperscript{244} Amnesty, as it is understood in the immigration context, suffers from this unavoidable correlation with a failed attempt to fix a vastly complex social dilemma in one broad stroke.\textsuperscript{245}

The negative connotation which the term amnesty carries reflects both myth and reality.\textsuperscript{246} The reality is that full-scale amnesty, as implemented in 1986, failed to rectify a broken immigration system.\textsuperscript{247} The myth is that because of this failure all legalization attempts should be subjected to heightened scrutiny and skepticism.\textsuperscript{248} Rather, predicting the success or failure of immigration reform measures demands a tempered analysis.\textsuperscript{249} Whether the concept is referred to as immigration, no single act or set of actions by the United States will eliminate it. Illegal immigration will always be part of American life.

amnesty or legalization should be of no consequence to the utility of its design. Incorporating a provision in the INA that would enable immigrants already within the United States to adjust their legal status must be approached with reasoned analysis instead of fear or disdain.

The political dogma that drives criticism of amnesty must give way to even-handed reform initiatives before Section 245(i) will have an opportunity to resurface. Despite proven success in attaining immigration goals, Section 245(i) is at the mercy of public opinion. Once immigration policy debates shift from polarized factions to a solution-oriented approach, Section 245(i) may eventually escape the amnesty misnomer that currently prevents reenactment.

Without Section 245(i) in place to soften the effect of the bars, the three and ten-year sanctions to reentry are simply too harsh to serve their intended purpose. So long as the bars act to trap undocumented immigrants in the country, rather than deter illegal entry in the first place, they are counter effective and therefore should be repealed.
