

Audio Wisdom

What is Audio Wisdom?

The explosion of internet and portable technology is having a profound impact on the way people learn. Portability allows the learner to access media at their convenience while streaming media permits the learner to access media on demand.

Audio Wisdom embraces methods of delivering audio to the learner that are accessible, convenient and of good intelligibility.

Why Would You Use It?

- ◆ To improve sharing and collaboration
- ◆ To encourage participation
- ◆ To improve presentations
- ◆ To improve the listening experience
- ◆ To make the delivery convenient
- ◆ To reinforce the message

How Do You Get Started?

Complete the following steps:

1. **Understand your audience:**
 - Students
 - Peers
 - Adult learners
2. **Capture audio:**
 - Comfortable setting
 - Captured during lecture
 - Equipment and software
 - Compress
3. **Share your recordings:**
 - Springboard!
 - UA on iTunesU (podcast)
 - Streaming
 - Coursecast
4. **Come talk to Design & Development Services for more help.**

How Do You Get Training?

Design & Development Services can provide individual or small group training and can provide links to tutorial resources or develop tutorial resources as staffing allows.

How Can You Get Help?

Design & Development Services can provide technical support and general tutorial support. We can provide consulting for the instructional use of audio wisdom.
