

Carlisle DeJulius

Biomedical Engineering, Biomaterials & Tissues Track

Hometown: Kent, OH

Professional/Student Organizations:

- Society of Women Engineers
- Biomedical Engineering Society
- Tau Beta Pi
- Omicron Delta Kappa
- Dance Marathon at UA
- Akron Running Club
- Women in Engineering

Why UA College of Engineering?

The atmosphere at UA is very welcoming. The Women in Engineering Program was very appealing as a female in a traditionally male-dominated field. Engineering class sizes are very small, allowing for personal interaction with faculty. There is an abundance of research opportunities for undergraduates, and the College in general allows for a great deal of customization for students (co-ops, internships, research, etc.).

Why did you choose your major?

I chose Biomedical Engineering because it allowed me to solve medical problems while focusing on engineering principles. I enjoy learning about the underlying mechanisms driving physiological phenomena.
