

Casey Cox

Civil Engineering
Minor in Business Essentials for Engineering Majors

Hometown: Shelby, OH

Professional/Student Organizations:

- American Society of Civil Engineers
- Campus Focus

Why UA College of Engineering?

I chose UA College of Engineering because I felt welcomed and right at home when I stepped onto campus. I was also intrigued by the Student Steel Bridge Competition Team which I was a part of for three years. Additionally, the co-op program was another key factor in my decision because I wanted on the job experience. A final factor in my decision was the size of the University of Akron and College of Engineering; it was just right. Big enough that I had plenty of opportunities but small enough that I felt like a person and not a number.

Why did you choose your major?

I chose my major of Civil Engineering because I have a passion for the transportation network. As a kid I was fascinated by how roads and highways were designed and constructed. Also, my strengths academically are math and science which are perfect for engineering.
