- Senior Design Team

Why UA College of Engineering?

When visiting The University of Akron, I found an engineering program that both taught theory and application. This is important to me because I wanted to attend a university that would prepare me to be a good engineer outside of school. Another thing I noticed was how the professors knew the students in their program. The college is the perfect size where you can go to your professors for any questions or conversations about life.

Why did you choose your major?

I didn't really know what I wanted to major in when I graduated high school. My Dad is an electrical engineer and he strongly advised me to start in electrical engineering. It has been 4 years in the program and I wouldn't change a thing. The program has really changed the way I see the world around me.
