Civil Engineering

Hometown: Monroeville, PA

Professional/Student Organization:

- National Society of Black Engineers

Why UA College of Engineering?

I chose The University of Akron because of the multiple scholarships they offered me, and the incredible opportunity of being part of the co-op program here. It also happened to be far enough away from home so that I could be independent and lead my own life.

Why did you choose your major?

I chose Civil Engineering because I feel like they have one of the most direct impacts on society. Civil Engineers have the potential to change the world and that's exactly what I want to do, whether it's big or small. Communities need us, and I like to somehow be there for them. Because every community deserves the opportunity to be great.
