

Eric Miller

Mechanical Engineering
Minor in Applied Mathematics
Professional Selling Certificate for Engineers

Hometown: Hollidaysburg, PA

Professional/Student Organizations:

- Tau Beta Pi Honors Engineering Society
- Human Powered Vehicle Team- Innovation Group
- ASME Student Member
- Omicron Delta Kappa
- EUREKA Honors Engineering

Internship/Co-op Positions: Pepperl+Fuchs (4 rotations)

Why UA College of Engineering?

The University of Akron caught my eye during my college search because of the tremendous engineering program here. In addition to the great Mechanical Engineering program, the Co-Op program provides invaluable work experience while you are still in college, which is a huge draw for the university, and rightfully so.

Why did you choose your major?

I chose Mechanical Engineering because I always enjoyed solving problems growing up, and I also excelled in Math and Science courses throughout middle school and high school. Mechanical Engineering affords students the opportunity to go in any number of professional directions, so I chose that to give myself as many options as possible. Lo and behold, I fell into a Sales Engineering Co-op with Pepperl+Fuchs and I couldn't be happier with my choice of Mechanical Engineering.
