

Adrianna Dunlap

Electrical Engineering

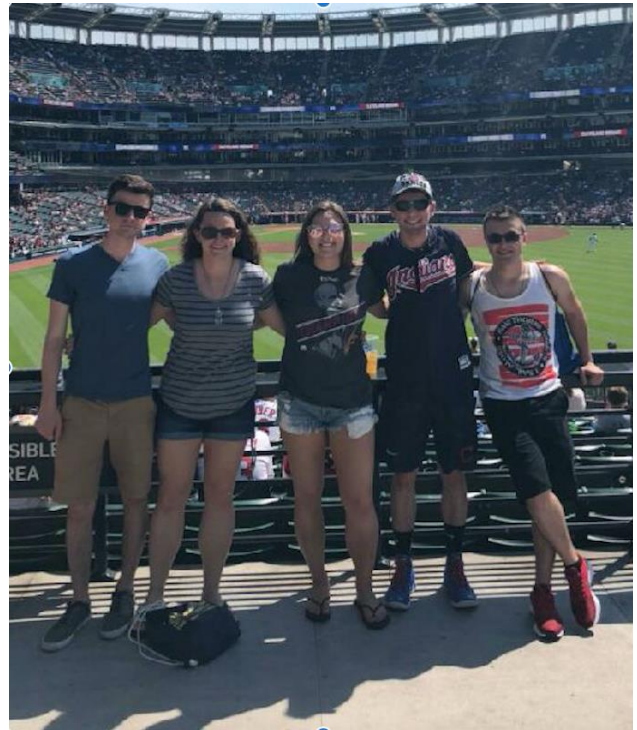

Hometown: Columbiana, OH

Professional/Student Organizations:

- Society of Women Engineers
- Tau Beta Pi
- Akron Chapter of the National Society of Collegiate Scholars
- Formula Electric

Co-op/Research Experience

- Delphi/Aptiv
- Honda R&D Americas
- Undergraduate Research

Why did you choose the University of Akron?

I chose the University of Akron because of their co-op program, the medium size of the campus, and being relatively close to home.

Why did you choose Electrical Engineering as your major?

I chose Electrical Engineering because I enjoy mathematics and science. In addition, I have the desire to advance technology, as it has become an integral part of our society.

What advice would you give to an incoming engineering student?

The best advice I can give to an incoming engineering student would be to not be intimidated and ask questions. As a student, you are here to learn and if you do not understand something, the professor will not know unless you ask them.

What resources were provided at the University of Akron to help you succeed as an engineering student?

Some resources provided at the University of Akron that helped me succeed were the design teams/organizations to gain hands-on experience, professors that go the extra mile, and the career fair that helped me obtain my co-op experiences.
