

Elizabeth Clifford

Mechanical Engineering
Business Minor

Hometown: Strongsville, Ohio

Professional/Student Organizations:

- Tau Beta Pi
- Zips Baja design team

Co-op/Research Experience

- The Lubrizol Corporation

Why did you choose the University of Akron?

I chose the University of Akron because campus felt like home! It was such a great community; everyone we met was genuinely interested in how we were doing and how to help make Akron a great experience.

Why did you choose Mechanical Engineering as your major?

I choose mechanical engineering because I wanted to follow my passion for vehicles and engines. It was a great option that combined teamwork and mathematics.

What advice would you give to an incoming engineering student?

The best advice I can give to incoming engineering students is to get involved! Being involved will help keep you busy and productive as well as help find a study group.

What resources were provided at the University of Akron to help you succeed as an engineering student?

The tutoring services available really helped me during the first few years at UA. The design teams that the University offers also served as a great way to create a study group as well as meet upperclassmen to help guide the way.
