

Auria Solutions

About Auria:

Auria is the world's second largest supplier of automotive acoustic and other fiber-based products. The Company consists of 26 manufacturing facilities; 10 commercial, engineering and testing and tooling facilities, with approximately 5,000 employees globally, as well as interest in three joint ventures.

Our Product Line:

- *Automotive Acoustic Systems:* Auria automotive acoustic systems block and absorb road and structural noise and reduce engine noise in the vehicle's interior. Our unique NVH testing and development facilities around the world enable us to create the right interior noise solution for our customers. Looking to the future, our products and expertise are ideal for the move toward electric vehicles (EV). While electric vehicles provide a quieter engine, it often comes at the expense of undesirable noises previously masked by the combustion engine. Auria's proprietary electric vehicle acoustic systems are designed to alleviate this problem.

Products & Processes include: Dash Insulators and Absorbers, Airlay and Densified fiber, Vertical Lapped Fiber, Mass Back Extrusion, Foam-in-place and Custom Sheeting.

- *Flooring:* The flooring system plays a significant role in all vehicles as the major trim feature and is the carrier for a significant portion of the vehicle sound insulation. From luxury textile surfaces to durable rubber industrial vehicles, Auria has the right flooring solution for all types of vehicles.

Products & Processes include: Carpeted Floors, TPO & PVC Utility Flooring, Accessory Mats, Tufted & Non-Woven Textiles, Utility Vacuum Forming and Compression Molding.

- *Other Fiber-Based Systems:* Auria's other fiber-based systems provide comfort, style, safety and functionality for the interior of the vehicle. Our complete line of systems include trunk trim, package trays, wheel liners, acoustic mapping and light weighting services.

Products & Processes Include: Trunk Trim, Package Trays, Wheel Liners, Acoustic Mapping, Light Weighted Services.

Summer 2020 Internship positions available at our plants in Sidney, OH; Fremont, OH; Holmesville, OH; St. Clair, MI:

- Mechanical Engineer - Intern
- Industrial Engineer - Intern

Requirements of Summer Interns:

- Pursuing a degree in a related field (i.e. Mechanical/Industrial Engineering)
- Minimum of a 3.0 GPA preferred out of a 4.0 Scale.
- Strong interest in the automotive supplier industry.
- Must be willing to work in a Manufacturing Environment
