

Spang & Company

Founded in 1894, Spang & Company is a diversified manufacturing company. Through the work of three unique product lines, we design, produce and supply precision soft magnetic components and materials to the electronics industry and custom engineered solutions to the power industry. With headquarters in Pittsburgh, Pennsylvania, Spang & Company provides products and services on a worldwide scale, with sales offices and manufacturing plants around the globe.

Magnetics is a leading supplier of precision soft magnetic components. We specialize in the research, design and production of a broad range of high-quality powder cores, ferrite cores and strip wound cores. Our products are used for applications such as inductors, filters, transformers in industries such as aerospace, military, computer and medical. Magnetics' headquarters is in Pittsburgh, Pennsylvania. We have additional facilities in Haicang, China and an international sales office and distribution center in Kowloon, Hong Kong.

Spang Power Electronics designs and manufactures a full line of power control equipment for highly critical industrial processes including SCR power controllers, dry type transformers, AC and DC power systems, specialty AC and DC drives and automation control systems. For over 50 years, our products and systems have been specified for highly critical industrial processes in glass, polysilicon/solar, coatings, fibers, industrial heating, and many other industries. Spang Power Electronics is headquartered in Mentor, Ohio, with manufacturing facilities in Sandy Lake, Pennsylvania and Xiamen, China.

Spang Engineered Solutions offers custom inductors and transformers in an array of industries. We are distinctive because of our rapid response and our technical strength with challenging designs for high power inductors. We have developed innovative tools that not only allow us to design an inductor quickly, but give us the ability to identify alternative solutions for a range of cost and performance tradeoffs. Spang Engineered Solutions is located in Pittsburgh, Pennsylvania.

We are looking primarily for students majoring in Electrical Engineering for full-time Field Service positions for May 2020 and December 2020 graduation. Resumes are kept on file for two years and are reviewed as positions come open, so feel free to drop off a resume for future openings.
