

Graduate students in the field and at scientific meetings.

# New Accelerated Degree Pathway in Geosciences

**Earn a Bachelor's degree AND a Master's degree in 5 years!**

Accelerate your academic studies and graduate with an M.S. degree in Geosciences sought for many in-demand careers in environmental and geology fields.

Write a thesis that demonstrates your ability to perform a geosciences investigation and experience with presentation of scientific results that employers want.

**The paired degrees are:**

- BA Environmental Science & MS Environmental Geology
- BA Earth Science & MS Earth Science
- BS Geology & MS Geology

**Who can apply?**

- Students who have completed 60-90 credits of undergraduate coursework and
- Students who have a minimum 3.3 GPA and
- Students who have identified a faculty member to act as M.S. thesis advisor
