

## Steps Performed by Student

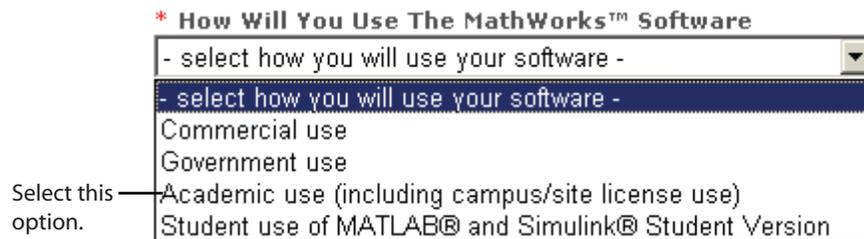

### Step 1: Create a MathWorks Account

 Student	<ul style="list-style-type: none"><li>- Create a MathWorks Account.</li><li>- Associate account with TAH license.</li><li>- Install product files.</li><li>- Activate installation.</li></ul>
--	---

To activate the software, you must have a MathWorks Account. You can use an existing account, but the e-mail address used for the account must include the university's e-mail domain and the account must be set up for academic use.

You can create an account at the MathWorks Web site or during the installation process (see "Step 3: Install Product Files" on page 1-36)

To create an account at The MathWorks Web site, click the **Create Account** link. When you create the account, make sure to set it up for academic use, as shown in the following figure.

### Step 2: Associate Your Account with the License

 Student	<ul style="list-style-type: none"><li>- Create a MathWorks Account.</li><li>- Associate account with TAH license.</li><li>- Install product files.</li><li>- Activate installation.</li></ul>
--	---

To activate the software, you must associate your MathWorks Account with the TAH Student license using the Activation Key.

You can associate with a license using the License Center at the MathWorks Web site or during installation using the MathWorks installer (see “Step 3: Install Product Files” on page 1-36).

To associate with a license at the License Center, follow these instructions:

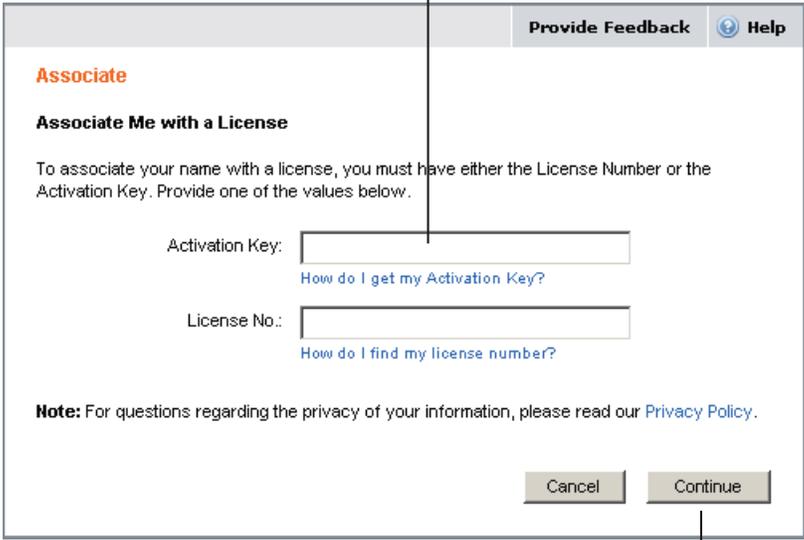

**1** Go to the MathWorks Web site and log in to your MathWorks Account.

**2** On the My Account page, click **Manage Licenses**.

**3** On the My Licenses page, click  .

**4** In the Associate dialog box, enter the Activation Key of the TAH Campus license.

Enter Activation Key.

**Associate**

**Associate Me with a License**

To associate your name with a license, you must have either the License Number or the Activation Key. Provide one of the values below.

Activation Key:

[How do I get my Activation Key?](#)

License No.:

[How do I find my license number?](#)

**Note:** For questions regarding the privacy of your information, please read our [Privacy Policy](#).

Click Continue.

### Step 3: Install Product Files

 Student	<ul style="list-style-type: none"><li>- Create a MathWorks Account.</li><li>- Associate account with TAH license.</li><li>- Install product files.</li><li>- Activate installation.</li></ul>
--	---

- 1 Get the Activation Key for the TAH Student license and any instructions your administrator has prepared.
- 2 Get access to the product files. For example, the administrator at your site might give you the location on a server on your internal network where you can get the files.

If your administrator wants you to download product files from the MathWorks, you must go to the License Center at the MathWorks Web site and log in to your MathWorks Account. (If you need to create an account, see “Step 1: Create a MathWorks Account” on page 1-34.) On the My Account page, click **Manage Licenses** to get to the License Center. To download, you must associate your account with the TAH Student license (see “Step 2: Associate Your Account with the License” on page 1-34). On the My Licenses page, click **Download Product Updates**.

- 3 Start the MathWorks installer specific to your platform.
  - Windows: Double-click thesetup.exe file. If you have access to the product DVD, the installer starts automatically when you insert the DVD into the DVD drive connected to your computer.
  - Macintosh: Double-click the InstallForMacOSX file.
  - Linux/Unix: Run the install.sh script.

---

**Note** The following details the installation steps on a Windows platform, but the process is similar on Macintosh, Linux, and UNIX platforms.

---

- 4 Choose to install automatically using the Internet in the Installer Welcome dialog box.

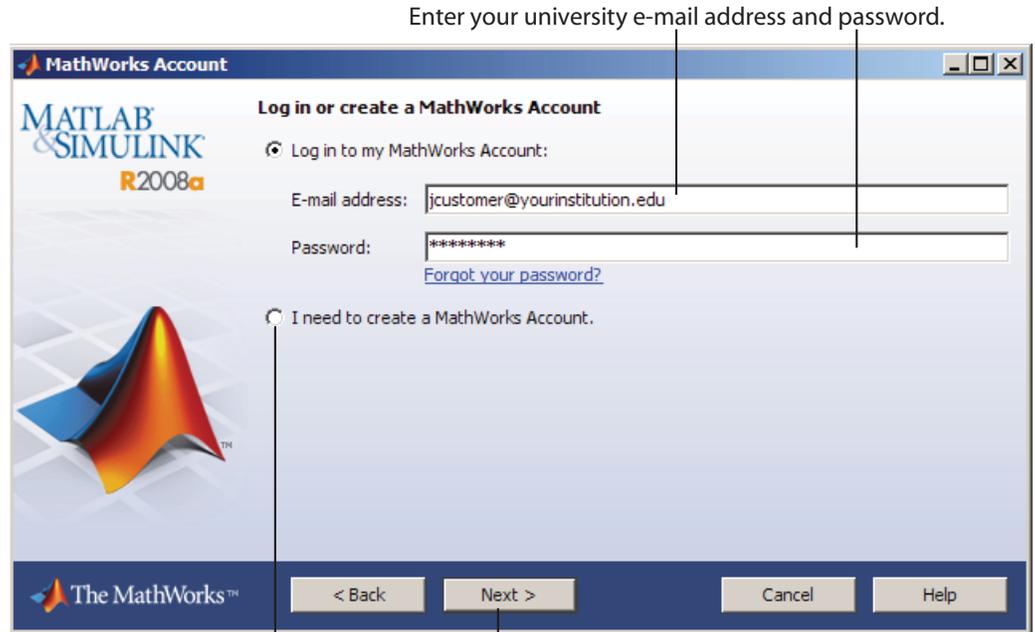

Select this option to install products (recommended).

Click Next.

- 5 Review the software license agreement and click **Next**.

- 6 Log in to your MathWorks Account, specifying your e-mail address and password, and click **Next**. If you need to create an account, select the **I need to create a MathWorks Account** option and click **Next**.

Select this option if you need to create an account.

Click Next.

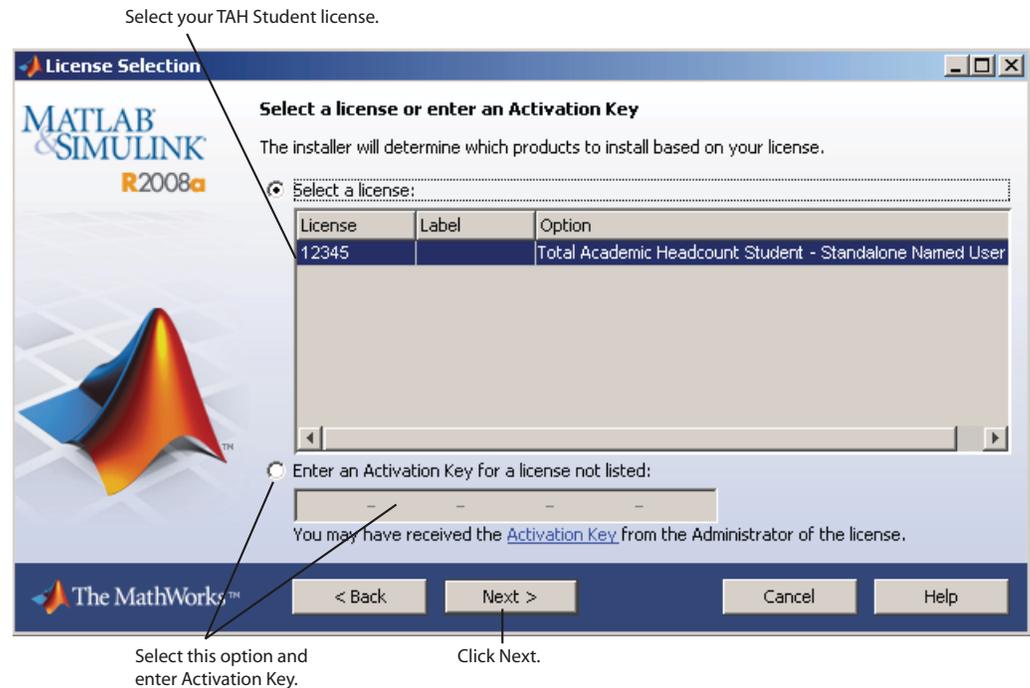

If you are creating a new account, enter your e-mail address, first name, and last name in the Account Creation dialog box. When you create an account you must associate it with a license. Specify the Activation Key to associate with the TAH Student license and click **Next**.

Enter your university e-mail address, first name, and last name.

Click Next.      Enter Activation Key.

- 7 Specify the license you want to install in the License Selection dialog box.
  - If you have the Activation Key for the TAH Student license, select the **Enter an Activation Key for a license not listed** option and enter the Activation Key.
  - If you have already associated your account with the TAH Student license at the License Center, select the license from the list of licenses.
  - If you created an account in the previous step, you already specified the Activation Key, so the installer skips this step.

After specifying the license, click **Next**.

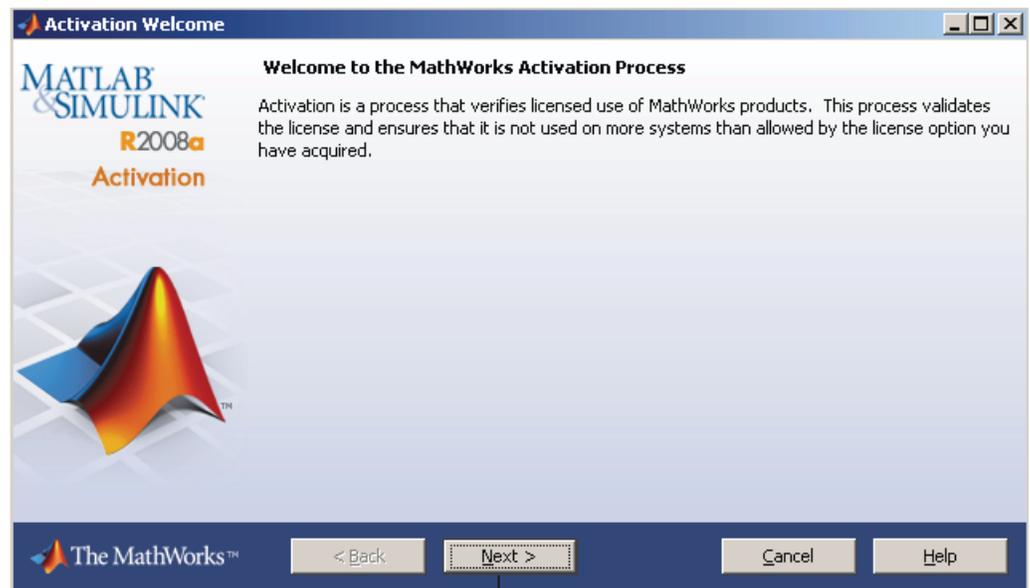

- 8 Select the **Typical** option in the Installation Type dialog box. This ensures that all products on the TAH Student license get installed.
- 9 Specify the folder in which you want to install the software and click **Next**.
- 10 Confirm your choices and click **Next**.
- 11 When the MathWorks installer finishes, it displays the Installation Complete dialog box. In this dialog box, you can choose to activate the software you just installed. You cannot use the software you installed until you activate it. The MathWorks recommends activating immediately after installation. If you want to activate later in a separate process, clear the option and click **Next**. To proceed with activation, leave the option selected and click **Next**.

## Step 4: Activate the Software

 Student	<ul style="list-style-type: none"><li>- Create a MathWorks Account.</li><li>- Associate account with TAH license.</li><li>- Install product files.</li><li>- Activate installation.</li></ul>
--	---

1 In the Activation Welcome dialog box, click **Next**.

**Note** If you started the activation application, rather than letting the installer start it, you must choose whether to activate automatically or manually. The MathWorks recommends activating automatically.

Click Next.

2 Log in to your MathWorks Account and click **Next**.

**Note** If you let the installer start the activation application and you were logged in to your account, the activation application skips this step.

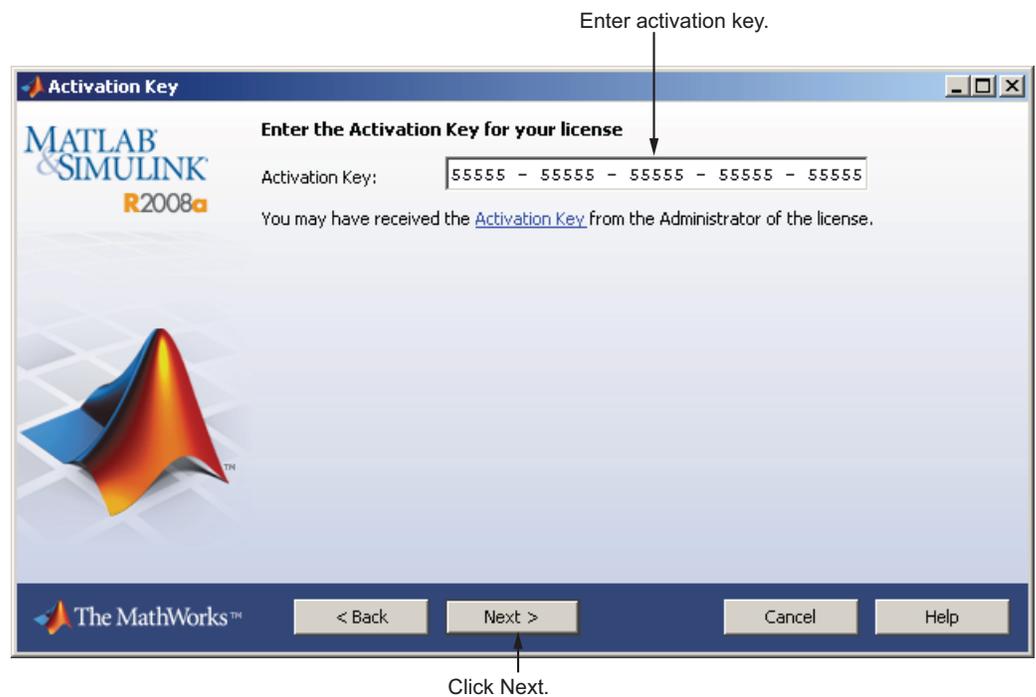

---

- 3** Select the license you want to activate and click **Next**.

**Note** If you let the installer start the activation application and you were logged in to your account, the activation application skips this step.

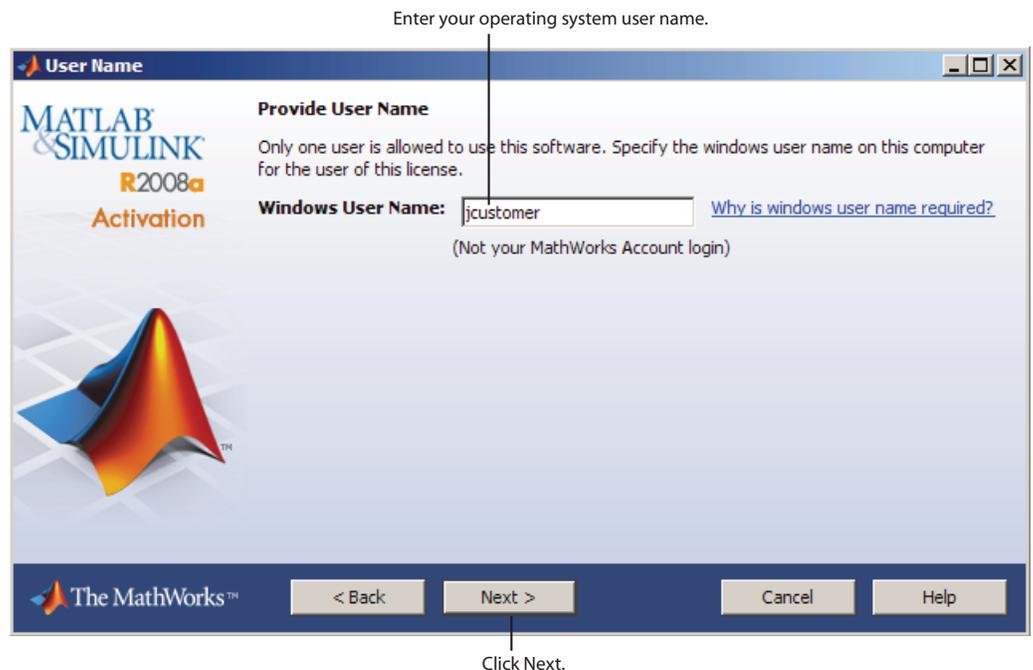

---

- 4** Specify the Activation Key in the Activation Key dialog box and click **Next**.

- 5** Specify the operating system user name of the person who will use the software. The operating system user name is the ID under which you gain access to your computer. It is also known as computer login name. The

Standalone Named User activation type locks the software to the user name and to the computer host ID. To use the MathWorks software, you must be logged into the computer as the user name you specify.

- 6 Confirm your activation information in the Confirmation dialog box and click **Activate** to activate the software.
- 7 Complete the activation process by clicking **Finish** in the Activation Complete dialog box.
