

Campus Solutions PeopleTools 8.55

Major Changes for End Users

- **No more Crystal Reports** - Crystal Reports have been converted over time to other technologies (BI Publisher reports, SQR, etc.) by the Application Development staff. If you are running a report, and there is a Crystal and BI Publisher option, select the BI Publisher option).
- **Re-instating password expiration** - User accounts in Campus Solutions have not expired for some time due to a bug in the old tools version. We are re-instating Password Expiration, just like in the HCM and Finance systems. We will do this in a rolling fashion, so accounts will expire over the next few months. Password rules will be the same as these other systems:
 - At least 8 characters in length
 - At least 1 UPPERCASE letter
 - At least 1 numeral
 - Must be reset at least every 180 days
- **64-bit Oracle 12 Client / New PeopleSoft Client Tools** - Users of the PeopleSoft App Designer and other client tools will need to have the 64-bit Oracle 12 client pushed to their computer. PeopleTools 8.55 requires this 64-bit version. You would then be able to install the PeopleTools from the K drive as normal.

- **New Login page** - The login page to the new Campus Solutions will look like the login page for HCM and Finance. Users will still agree to the FERPA rules by signing in, however the details of those rules will be linked on a secondary page if needed.

- **New top menu** - When using PeopleSoft pages, you will now see the navigation menu at the top of the screen instead of on the left side. The menu will drop-down. This is in line with the how the HCM and Finance systems operate, and provides for more screen space for the pages and easier navigation.
