

Directions for Hydrogel Hunt

- 1) Your group needs to go to the store to identify at least 5 hydrogels. They must be 5 different hydrogels not simply a variation on one particular hydrogel. (For example, if you select Jello, you may not have Cherry Jello, Orange Jello, Blue Raspberry Jello, Lime and Strawberry Banana Jello. If you did this, you would only get credit for 1.)
- 2) Take a picture of a group member (or members) with the hydrogel.
- 3) Explain with at least 3 facts why you think the item selected is a hydrogel. (You are encouraged to do some research for this portion of the activity.)
- 4) Assemble your pictures into a poster and turn it in by the due date _____.
(Your poster can be on poster board or you may create an electronic poster using PowerPoint, Prezi, etc.)
- 5) If your group is feeling industrious, you may get extra credit by including extra hydrogels (more than 5) in your poster. (You will get extra credit for a maximum of 15 hydrogels in your poster.)
