# Quality Control Manager

It is your responsibility to <u>read</u> the activities, and <u>ensure</u> that your team members are following the procedures properly. It is also your responsibility to help clean up at your table when you are given the "5-minute warning".

# Materials Manager

It is your responsibility to get all materials (supplies) needed for the lab, clean and return all materials to the demonstration table. In case of an accident, it is also your responsibility to clean up.

# Data Manager

It is your responsibility to <u>record</u> the data from activities, and <u>ensure</u> your team members each copy accurate data onto their worksheets when time is available. It is also your responsibility to help clean up at your table when you are given the "5-minute warning".

# Technical Manager

It is your responsibility to <u>perform</u> the activities, and <u>ask for help</u> from your team members when needed. It is also your responsibility to help clean up at your table when you are given the "5-minute warning".
