

# Governor's Awards 2014

## Agricultural or Food Technology Research

Alexandria	Oliverio	9	St. Vincent- St. Mary	Constructing an Algae Bioreactor to Remove Excess Environmental CO2 and Produce a Nutritional Sustainable Food Source
------------	----------	---	-----------------------	---

## Advanced Materials Science Research

Kimberly	Gliebe	12	Mentor High	Synthesis of organic Materials for Photovoltaics
----------	--------	----	-------------	--

## Biotechnology / Biomedical Technology Research

Grace	Nemeckay	11	Mentor High	An In Vitro Tumor Capillary Model that Mimics the Real Life Tumor Microenvironment: Development and Assessment
-------	----------	----	-------------	--

## Environmental Protection Research

Natalie	Petit	9	St. Vincent- St. Mary	Effects of Watershed Imperviousness on Stream Macroinvertebrates
---------	-------	---	-----------------------	--

## Advanced or Alternative Energy Research

Chris	Kim	10	Hudson High School	Design of Electrode Using Exoskeleton Biopolymer
-------	-----	----	--------------------	--

## Information Science and Technology Research

Danny	Kim	10	Hudson High School	Efficient Data Transfer Through Visible Light Communication (VLC)
-------	-----	----	--------------------	---
